WOMEN VOTERS HEED YETHIS

The special session of the State begislature held last week made some changes in the election laws that are of profound interest to women all over the state. According to the new law the last day to receive applications to be made voters will be Tuesday, October 5. The day set town elections on that day and con. tiful woman on the speaking stage as tion, which had voted solidly for liquor raids he made in that town. sequently the change was made.

This necessitated moving along the first day to make voters so as to give the registrare time to prepare the to-be-made lists. Accordingly the first day to make voters in Connecticat in all towns having a population of 15,000 or over, will be Saturday, October 9. . The time of making voters has been extended to October 19. That means that there will be ten days allowed to make voters instead of seven,

It is of the atmost importance to women desiring to enter into the full enjoyment of the voting privilege to take due and timely notice of above and govern themselves accordingly. Pailing in this they will not b permitted to east their first vote for

'My Crawford Is Really Two Ranges in One"

er AND I can use them together or separately, just as I wish. See what a nice gas stove I have at the end of the coal range, where it is most convenient! Five gas burners on the top, a great roomy oven, with a rack, and a folding broiler below the oven!

"But much as I like the gas stove I simply couldn't get along without the coal range. Right now, you see, I've got my cold pack canner on the coal stove, while my jelly is boiling on the gas and the sugar is warming in the oven. And there's bread baking in the coal oven, too. That helps me save fuel -and I get a lot more done in a day.

THERE'S another splendid thing about my coal range—the Crawford Single Damper. I set the knob at 'Bake,' 'Check,' or 'Kindle,'-which are plainly marked on the stove top-and I can always be sure my oven will be just the right temperature. This damper also regulates the heat under the top griddles.

"And here, too, is another reason why I'm so fond of my Crawford. Tucked in behind those doors in the stove base is a pair of interchangeable hods. As soon as I use up the coal in the one on the right, I will take out the one on the left which has been catching the ashes from the chute, and move the other over into it's place. Then I can carry the one with ashes down cellar, empty it and bring it back full of coal-all in one trip.
