The Next President of the United States

The Next President.

As certain as anything can be, in this world, s the election of Senator Harding. To readers of this newspaper, the many

family groups to which it comes a regular welcome visiter, Senator Harding's face shines as that of a friend. Senator Harding, your next President, is your kind of man. You see him, hear a few

words, and you know it. He was born in a small town, has lived there all his life, lives there now, and will live there again when he leaves the White House with his work for the country done. "We are service men and service HoweHe Lives.

"The American Legion is going to ing, in sympathy and in simplicity. You read his speeches and know that he America, in these disturbed times," he does not imagine himself created to tell all the world what to do. He believes in, and understands the American people, his friends, the citizens of his own little town, Marion, Ohio, and the dwellers in thousands of other towns like it.

Your Servant, Ne Autocrat. After you have elected him, you will find Senator Harding an earnest, conscientious, straight thinking servant of the people, not an autocrat, but a man respecting the traditions

of American government, and the Constitu-tion of the United States.

Senator Harding understands that the people will elect him to be President of the United States, not President of the whole world. He will know that he is employed by the PEOPLE of this country to look after

the interests of THIS country. Born on a farm, living all his life close to farmers, he knows and sympathizes with the problems of the farm. Living in the average American way, in the average American small town, he knows the problems of the average American. He understands the printers he employs, and he knows their trade and sets type as they do.

His Ambition. Senator Harding has no ambition to be called a political superman, or RULER of America. It is his ambition to be known as a good American, a faithful servant of those

that trust him. National politics are discussed this year less than at any election since the republic was founded. Why? Because men do not

was founded. Why? Because men do not discuss, to any great extent, that which is DEFINITELY SETTLED.

And this national election is definitely settled as you read this. YOU know it.

But it is important that demonstration of the popular will should be of the most overwheming kind. Therefore the good citizen will de what he can to increase the vote for Harding, should there be any doubtful votes within reach of his voice.

President or simple citizen, is not complicated in Mr. Harding's mind. He says: "As I said at the outset, government a very simple thing, government is only the regulation of our relationships to one another. The government's first task is the

protection of the minority against autocracy, or the demination of the majority that sometimes forgets the rights of the minority." "I am preaching the geopel of popular States, a government that does not know any class anywhere in all this Republic."

Alumni in Movement for Expansion of Holy Cross

WITH Holy Cross College, one of the oldest institutions of higher education in New England, closing its doors to scores of students every year because of inability to make room for them,

alumni and former students of the college are sponsoring a movement for the expansion of the school by the erection of five new buildings on the campus at Worcester, Mass. The movement took form at a reunion of alumni and former students at the college Labor Day. 'A realization of the crisis faced by the school came when it was learned that hallways now are being used as classrooms, dormitories are crowded to the limit of comfort, not a room in the college is large enough to hold its student body assembled, and last July it was necessary to halt enrollments for the present term. With this knowledge, the former students de-

I'm so fond of my Crawford. Tucked in behind those doors in the stove base is a pair of interchangeable hods. As soon as I use up the coal in the one on the right, I will take out the one on the left which has been catching the ashes from the chute, and move the other over into it's place. Then I can carry the one with ashes down cellar, empty it and bring it back full of coal-all in one trip.

"And here, too, is another reason why

"But much as I like the gas stove ! simply couldn't get along without the coal range. Right now, you see, I've got my cold pack canner on the coal stove, while my jelly is boiling on the gas and the sugar is warming in the oven. And there's bread baking in the coal oven, too. That helps me save fuel -and I get a lot more done in a day.

THERE'S another splendid thing about my coal range-the Crawford Single Damper. I set the knob at 'Bake,' 'Check,' or 'Kindle,' which are plainly marked on the stove top-and I can always be sure my oven will be just the gight temperature. This damper also regulates the heat under the top griddles.
