There seems to be no reason whatever why every woman should not be daintily gowned at comparatively small cost this summer. Fabrics of the washable variety, whether cotto or lines, are no longer in the luxury class, and certainly style designers have offered a splendid range of attractive styles.

Fabrica of Washable Variety Are No.

Longer in Class With High-

Priced Luxurles.

STREET GOWN OF BLUE CREPE

A frock of two materials is one of the excellent examples of smart simplicity offered this season. It may be white or plain color linen with cre tonne. This type of dress is cut of the simplest of lines, buttons sensible and comfortably in the center back and is of the one-piece variety. Th cretonne is used for collar and cuffs

and to form a girdle effect at either White organdle and gingham in half-inch check in blue and white, red and white or yellow and white, are frequently combined in dainty summer frocks. This combination is also worked out in some very pleasing blouses for wear with white tub skirts. he major portion of the blonse usually of the organdle with pipings, belt or girdle and collar, of gingham, instead of using the sheer material as trimming for the heavier fabric.

CORRECT FOR THE LUNCHEON Bisques and Bouillons Should Served in Two Handled Cups-

the Latest Bisques and boullions are the correct soups for luncheons and should be served in two-handled cups (the newest form is the two-handled cu which is very shallow and broadknown as a "cream soup cup"). The use of houllon cans at dinner or of soup plates at luncheon stamps th hostess as illinformed. Roast beef or mutton may not be offered as th hearty course at luncheon; chops croquettes, patties, birds or brolle chicken are correct. A formal lunch eon may be started with a fruit course of berries, grapefruit or melon or with a cocktail of mixed fruits; of with clams, crab ment or oysters.

BRIEF FASHION NOTES

Drawnwork on light frocks is a very popular form of decoration. Double stitching is used as tric ming on tailored serge suits. Plaited flounces are used on sleeve as side panels and as tunics, An effective mode is the hanging of loose panels from a low wajst line.

Swagger coats have high-buttone necks and narrow fitted shoulders. Among new fabrics for evening are self-tone brocades and beaded nets. Pallieties in square and oblong shapes are in much demand for evening gowns, Taffeta for hats is used in a combination brim of the taffeta and

crown of leghorn. · Plaid and striped ginghams are be ing used for warm weather separate skirts for both children and grownups .The "handkerchief" drapery is on of the new ideas evolved to bring shout the uneven line at the skirt edge so much favored this season. To terminate with estrich tips t

the very latest. These tips may matel in color with the dress or may be in vivid contrast. Many lace dresses have skirts deep, overlapping flounces; other models show tace draperies and almost in-variably the lace falls here and there below the edge of the underskirt, makog a soft, shadowy effect above the

A LINE O' CHEER

By John Kendrick Bange,

American ships, flying the Stars and Stripes will carry you and your goods anywhere Two and three generations ago, the Stars and Stripes were all over the world. Then they almost vanished from the seven sees. But today they are back again. Big splendid steamen, American owned and operated carrying passengers and goods, are crowding their way into all foreign harbors with the Stars and Stripes proudly fluttering from their mass.

American exporters, importers, travelers—all can help by ship-ping and salling under the Stars and Stripes. Operators of Passenger Services

THE LINCOLN MEMORIAL

Near the White House and the Washington Monument, and between the Capitol building and the National cemetery, 'this memorial is destined to become one of the most-visited of all the public buildings of the world. · The building is 202 feet long, 132 feet wide and surrounded by a row of marble columns, several feet in diameter at the base and 44 feet high. In the center of the interior is a colossal statue of Lincoln, in a seated position. Including the base, it is 30 feet high. It weighs 175 tons. It took

twenty marble cutters eighteen months to carve this statue. In each of the side walls are set

fit of the wealthy planters of cotton pete with the passenger train, either north or south or east or west. But with railroad freight rafes 20 to 40 per cent above the costs at which freight can be handled profitably by water, other people besides the waterways department of the federal government have learned that their average of 175 miles a day freight hast, as

a day of the average freight car, is a profitable it vestment of firewood, water, negro labor and hulls, which for these freighters seldom cost more definitely than \$25,000 to \$50,000. Realizing the size and importance of this back-to-the-water movement was to formally take effect when tof freight, the packet owners and the nine states had ratified it and on | builders are going thto it seriously.
