Here's why CAMELS are the quality cigarette

DECAUSE we put the utmost quality into this D one brand. Camels are as good as it's possible for skill, money and lifelong knowledge of fine tobaccos to make a cigarette.

Nothing is too good for Camels. And bear this in mind! Everything is done to make Camels the best cigarette it's possible to buy. Nothing is done simply for show.

Take the Camel package for instance. It's the most perfect packing science can devise to protect cigarettes and keep them fresh. Heavy paper -secure foil wrapping-revenue stamp to seal the fold and make the package air-tight. But there's nothing flashy about it. You'll find no extra wrappers. No frills or furbelows.

Such things do not improve the smoke any more than premiums or coupons. And remember-you must pay their extra cost or get lowered quality.

If you want the smoothest, mellowest, mildest cigarette you can imagine-and one entirely free from cigaretty aftertaste,

It's Camels for you.

down another perfect bunt that scored Johnson essily. There was an argument on Sipples first try at the !had hit the ball, not Sipples.

Sipples took up the pitch burden in the ninth with the score 5 to 8 in Manchester's favor. He got into Johnson, if trouble by passing Scanion who went to third on Johnson's hit and scored on a passed ball by Lamprecht which allowed Johnson to come across, This play knotted the game and brought the crowd back to the lot as they evidently thought the game was over. Warnock, the first man up Lulrey, 3b in the last of the ninth, struck out, Keating, of Sipples hit to center but was out on Howard, if a double play when Sherwood tagged Moran, c him with Massey's attempt at a hit and threw Massey out at first.

GATHER WHEN IN MILK STAGE

ities Desirable for Table Use Will Make Good Product-Sun Is Factor in Drying.

A vegetable which, when dried, is above criticism even by the most crit- sods or of Epsom salt, one or two ical, is corn. Other kinds of garden heaping teaspoonfuls to a cupful of products may or may not be liked by many people, but dried corn is the equal if not the superior of canned corn and can be used for practically as wide a variety of purposes. The ollowing directions for drying it are those advised by the United States De-

partment of Agriculture. Any of the varieties of sweet corn having qualities desirable for table use will make a good dried product. Corn intended for drying should be gathered when in the milk stage, before glazing and hardening have begun and when the corn is in an ideal condition for immediate table use. It should be gathered only as it can be prepared for drying, as corn deteriorates rap

Careful Preparation Essential. Husk the cars and trim with a knife to remove any injuries. The slik need not be removed, as it can be readily separated from the corn after drying. Place the ears in wire baskets or wire-bottom boxes and plunge into boiling water for eight to twelve minutes, or until the milk is set. A little salt may be added to the water if desired. Divide the corn into older and younger lots before blanching as the younger ears require somewhat longer cooking than the older water. Fluid extract of grindelia, di-

Why Red Ant Takes Prisoners. The red ant is a typical soldier; he ices nothing but fight. He has poweral taws, and is generally strong, but cannot get along without a slave feed him. If he were left to feed imself he would die. He continually raids the nests of weaker insects and orings them back as prisoners, thus olving the servant problem and keeping himself well supplied with atendants. There is a species of ant n Australia called the building ant, because of its extreme pugnacity. It will fight anything and everything. If one of these ants is accidentally cut n half, one half will actually fight the other half to the death.
