WILL BUILDING COSTS GO SUBSTANTIALLY LOWER THAN THEY ARE TODAY?

Many People Think They Will-Many Others Think They Will Not. The Fact Is, Nobody Knows

One thing everyone knows: In waiting for lower costs you are spending something more valuable than the money you may save, something that cannot be replaced.

That something is TIME-the years of your life. You may spend or lose your money and regain it, but the lost years will never come back.

Will the little that you may (or may not) save in money, in order that your estate may inventory a few more dollars, compensate you for withholding from yourself, your wife and your family the enjoyment of such a home, as you and they want, and bught to have?

Except to the miser, money is worth nothing beyond the satisfactions, comforts and pleasures it can bring in the life we are living HEREAND

An investment in a home is not speculation and there is no possibility of a loss, where there is a certainty of an abundant return in health and contentment. Why not, therefore, go forward unhesitatingly-at once-and build your home?

Prices of lots at GREENACRES are from \$400 to \$2,750, none higher.
