"IT IS CHEAPER TO BUILD THAN TO BUY"

BE A PART OF YOUR COMMUNITY

Not Merely a "Hanger On"

A man may not care for the opinions of others, yet it is the group opinion of a community that elassifies the man.

It is natural that a community regards the home owner with more respect than a renter; he is looked upon as a substantial citizen, having a vital interest in the common welfare.

AND THIS IS RIGHT.

A home owner "IS" the vital force of a community; his IS the voice that directs its course. .

With home ownership comes a pride of possession, a sense of self-respect of more responsible citizenship that betters the man and elevates his family. At work in office, store or shop, the home owner is looked upon as a man to be depended upon-to be advanced-one whose opinion is accepted.

HORTENSE.

TORTENSE is essentially a French name, though she has been adopted by all countries and she has the almost unique distinction among feminine names of having no contractions, diminutives or offspring of any form. Hortense she begins and Hortense she remains throughout hisory, with the single exception of Italy where the "H" is sometimes dropped

and she is called Ortensia. Like Sylvia, she is something of an ancient sylvan name, having come originally from the Latin "hortus," meaning a garden. The slave who tended those elaborate Roman gardens was called hortensius, and, finally through some strange quirk of fancy, t came to name an honorable old lebelan game.

For many centuries it continued in Italy and gradually the masculine form Ortensio came into use as a proper name, quickly followed, by the feminine Ortensia. The most famous Ortensia of those days was Ortensia Mancini, the niece of Mazarin. This notable lady carried her name into France, where the French straightway placed the stump of their language upon it by calling it Hortense. Since that time many famous women have borne it, particularly those of royal

Hortnese's jewel is the diamond, which is said to/give its wearer fearlessness, invulnerability and to bring victory in any endeavor, provided, however, that it is received as a gift and not purchased. To exercise its best power it should be set in gold and worn on the left hand. Its potency for Hortense is concerned not only with lovers, but is extended to enhance the love of a husband for his wife. Saturday is her lucky day and six her lucky number. The daisy, signifying innocence, is

Hortense's flower. (Copyright). ____

Are You Sure You Give Your Motor Fair Treatment?

To afford perfect lubrication in different types and conditions of motors, Socony Polarine Oils are made in three uniform grades

TOMOTIVE engineers estimate that at least 85% of all motor troubles are preventable by a careful study of the lubricating requirements of each individual motor—its condition as well as its design should be taken into consideration. The serviceability of many parts of the motor can be materially lengthened by using the proper grade of oil and shortened by a wrong grade.

The manufacturers of Socony Polarine Products began making automobile lubricants when the automobile was still in its infancy. The apparatus and methodsemployed today represent a long, unsurpassed experience in this branch of petroleum refining and manufacture.

You Can Rely Upon Every Socony Polarine Product

Socony Polarine Regular is an oil of medium body for use in cars where piston rings and working parts are properly fitted and in good condition, and for use during the winter months where an oil with a low cold test is desired.

Socony Polarine Heavy is an oil of heavy body and exceptional lubricating qualities. For use where loose-fitting parts require a heavier grade than the Regular, and during the summer months.

Socony Polarine Extra Heavy is a special grade manufactured for use in motorcycles, air-cooled motors, slide sleeve motors, slow speed motors, motors with large bore, and those excessively worn by long service.
