THE still-man at the refinery knows that there is a difference in various gasolines. So does the automotive engineer and the expert garage mechanic.

These are some of the "best results" that Socony's "uniform quality" insures: unvarying dependability, instant ignition, a quick start and pick-up, maximum power and high mileage per gallon. No gasoline can give you more.

It is the strict and literal truth when we say that at no previous time in the auto-
