## To the Careful Investor

The Eastern Construction and Investment Corporation, organized under the laws of the State of Connecticut, is building a structure at the corner of Main and Eldridge streets, South Manchester, which is to be the foundation of a sound, conservative money making enterprise which should and will interest the careful investor.

Within the corporation is an architect, our own masons, carpenters, heating engineers and in fact an organization ready to go out and do all the work necessary for the construction of a small or large building Herein we are in a position to save the prospective builder a considerable sum of money and at the same time make a fair profit for the corpora-

We are capitalized at \$50,000, par value of stock \$10 per share. This stock can be bought at par at present, giving the investor a chance to get in before a raise in the price of stock is made. All stock sold will be amply covered by construction work now in progress or contemplated and the proposition is one which will merit the closest investigationwhich we welcome.

For further information apply to the Superintendent,
