THE VANISHING LOVE STORY

Who will explain the pastime of the love story? Will she blame the man, or the woman, or the world?

The simple, straightforward love story, with its triumphant ending in the last chapter, has lately vanished from the pages of the current "Bookman" in the United States.

Who will explain the pastime of the love story? Will she blame the man, or the woman, or the world?

THE NATURAL PEARL

Artificial "Gems" Cheaply Produced to resemble the natural pearls of the sea.

It appears that the lining of a pearl mussel shell or of a pearl oyster is produced in the same manner as that which composes the pearl itself.

It is a fact that the material is so common that it can be produced in large quantities.

To make artificial pearls, clear mother-of-pearl is reduced to a fine powder and mixed with iron, steel, silver and a little pigment.

This is the process described by a westerner who possesses much knowledge of the pearl industry of the Middle West.

A New Jersey man has invented a process to make imitation pearls from beads of highly polished silver coated with a translucent, opalescent material.

The most familiar artificial pearls are those which are made from glass beads with a substance of pearl color.

The new wad, lead and bronze, do not contain any of the elements of the pearl.

AN EASY CURE

Doctor Prescribes Plenty of Laugh and a Good Deal of Rest.

For a year Louis Gales, most popular Hartford actor, has been suffering from a nervous condition.

It is a fact that the material is so common that it can be produced in large quantities.

To make artificial pearls, clear mother-of-pearl is reduced to a fine powder and mixed with iron, steel, silver and a little pigment.

MARKET LETTER

(Furnished by Putnam & Co., 6 Central Row, Hartford)

The past week has brought in very little stock market news and very little to say about the market.

Fluctuations of averages have been comparatively unimportant.

Individual stocks have shown some activity.

The most significant of these is the case of the Standard Oil of New Jersey.

The price of this stock has risen sharply.

This is due to the fact that the company has announced a dividend.

The dividend is the highest in the company's history.

This is a reflection of the company's strong financial position.

The market is expected to remain active in the near future.

Investors should watch the market closely.

The market is expected to remain active in the near future.

Investors should watch the market closely.

The market is expected to remain active in the near future.

Investors should watch the market closely.
