In the opinion of many legal experts there has been a great deal of talk about the terms of the trust company in this locality, and the time seems ripe for the public to learn what the wills of the wills are.

Establishments there will undoubtedly be a great many changes in the wills of the wills, and will probably be seen the next few days digging up old wills and trying to come up with them.

Thus costs no more to have a trust company act for you. Furthermore, the trust company often effects many economies. Because of its financial responsibility, it is not required to furnish a bond, saving your estate the expense of premiums.

The established and efficient machinery of the trust company is at the service of your beneficiaries at no greater cost than would be allowed an individual who might properly charge various items of office and operating expense.

THE TRADE ALTERNATIVE

Recently in D. C., aged

and committed suicide rather than be separated by entering

into a marriage which he

recalled a similar occurrence

in Richmond, Va., in 1916 and recent

silk stockings.

It seems however that among the

hundreds of hours for aged people

in the country there are few

provisions for the care of married

people who after struggling

with separation and the dissolution

of their marriage in their declining

years.

Domestic ties are not less

firmly by misfortune than by

property. Property, with its

resources, promises

or hope, is a bitter lot without the

needless pain of separation.

The right of property is a

matter of course.

This is not a question of merit

or demerit. Every state and every

community recognizes its ob

ligation to the aged and indigent

and it is the duty of every state to

see that the obligation is met without

severing bonds which states prove

A DANGEROUS CREED

With the trial of the alleged

syndicalists, which began last

week in Indianapolis, Indiana, the

law which places a ban on this

class of persons as undesirable

test as any conceivable test as

an efficient measure of protection

against the agitation of the com

munist party in the womb and

most vicious phase of com

minism.

To those who consider the issue

as one closely concerned with the

rights of speech and personal

liberty, who begin to argue that

the syndicalists are an

architects in the light of aggression

and tyranny, they will find a

comprehensive study of the aims

and results of this school of

destructive political philosophy

in the book "The Destructive

Philosophy of Syndicalism,"

which is opposed to any

form of capitalism which is an

either way of life or property of

every kind. It believes in no laws that

restrict the rights of the minority

and majority and condemns

any form of course of

action.

To accomplish this the syndicalist

wishes the industry in which he is

engaged, and property of the

owners are not considered because

the workers have no rights.

And under this system the great middle classes

must either disappear or be destroyed.

Religion is eliminated or made in

tooth and nail.

The syndicalist is a

man who is born to

disrupt and education

is disengaged because it is

the only way to create

favorable public sentiment

and it's world bound in chain

and iron.

To accomplish his purpose he

syndicalists greatest task and

outwardly sabotage and

outrage. His program is the same

as the world over and the

the world is the same.

That is why this is

so important.

The gospel of syndicalism

teaches the workers to

work for themselves

and not for others.

The workers are to

work for themselves

and not for others.
