BUILDING LOTS WHICH?

We can supply either, but if you are looking for a site for a home for present or future use be advised and see that the necessary facilities are available, such as proximity to trolley, schools, churches and that the streets are graded and sidewalks laid,-it is also necessary to have town water, sewers, gas and street lights,-also see that the section is protected by reasonable building restrictions—these are a few of the things that are already assured you if you buy at GREENACRES and is undoubtedly the secret of the remarkable growth in this premier section of our town.

The best is none too good—therefore—why not the best, especially when the price is no more than is being asked in inferior locations. We still have lots to offer on Brookflied, Benton, Branford, Durkin, Lenox and Middle Turnpike. For \$400 to \$600 we can sell you some of the best values in Town.

"Fifty yards, 100 meters, 200 meters, 300 yards, 500 meters, 100 yards on the back, 150 yards on the back.

"The other records credited to Weissmuller last year were made in open water or in tanks of twenty yards, and that is an obstacle to their recognition. But what about the records regularly broken which do not figure in the official lists?

"Majagus for Baseball Bats About two years ago experiments proved that Cuban majagus was ideally adapted for the manufacture of baseball bats. This hardwood is of tough fiber and it can be used for any purpose requiring material that will not break easily. Within the past year a growing interest has developed in the United States in the importation of majagua for the manufacture of baseball Bats.
