BAITING THE SUPREME COURT

This is much being said these days in criticism of the power exercised by the United States on supreme court.

It is what Chief Justice Marshall says as his view of it, and it is the commonly accredited view:

"It is a proposition too plain to be contested that the constitution and the laws made in pursuance thereof are superior to any conflictual statute made or to be made by any power of the Union."

The Constitution, when it is

read, gives the power to the national government to regulate commerce among the states, and to regulate

the value of money, and to coin

money, and to establish post roads, and to make rules for the regulation of commerce with foreign nations, and of

the dominions of the United States, and with the Indian tribes, and to define and punish offenses against the United States, and to declare war, and to grant letters of mar-
