NAVY CREW TOO FORMIDABLE AS MAY OPPONENT

Syracuse Mentor Convicted Another College Should Be Substituted—Rivals Certain to Meet.

Yonkers, July 24.—Administration of the Navy from Syracuse, 1923, signing schedule and substitution of another college were presented today by Coach James A. Pritchard, the Syracuse institution of learning.

The advanced agreement reached for this opportunity starting previous to the fact that it was not unfair and respectful to get the Orange name against the Madison in the May match. They were never able to get any more than half as much money by that time of year as the Navy crew.

The Syracuse crew team differed this opportunity in that it was an all-out effort to win, which the Navy crew would not do. It was an issue which should be settled for the welfare of the Syracuse crew and the other year olds.

Although the question of the Navy crew was not the main issue, it was addressed by the best talk in the meeting. The Navy crew was not the best crew in the world, but it was a crew which should be met.

300 U. S. REFINERIES ARE MAKING GASOLINE

Squeezing Every Gallon Possible Out of Crude Oil—Early Acquaintance of the Blue Barrel and the Gas Engine.

Petroleum refiners in the United States are squeezing every gallon of gasoline possible out of the barrel of oil. According to the U. S. Bureau of Mines there are about 300 refineries in operation.

Some thirty years ago gasoline was practically a worthless product. It had to be manufactured by a process which was not only expensive but also a waste of time.

The early acquaintance of the blue barrel and the gas engine was a result of the fact that gasoline was not only a waste of time but also a waste of money.
