TOWN PLANNING

The recent efforts of town planning commission have again sprung out and it appears that the question may be carried forward very shortly. Very often the town planning committee have given rise to the creation of a new town having an active part in the developments for the interests not only of the town, but for the progress of the entire state. They are now seeking to make their mark in the United States. They are the creators of the state of Louisiana and all other states.

A widespread conspiracy to bring the United States into the Philippines through forged currency entries of money has been unearthed by the Customs Service. A large number of Celestials are believed to have already entered by the illegal route.

The recent differences between farmers and landlords in Nanking, China, province, as a result of which 1,000 men went to strike, have been settled and an agreement has been entered into between the conflicting parties.

Squatters to the number of 138 in the city of Shantou, China, have been housed in tents and are making a hard fight against being evicted. They have purchased lots under a leasehold arrangement, to learn what they can do with them.

In order to avoid this state of affairs the state legislature has made provision for the formation of local town committees to be formed to take care of the squatters. They recently received an order to clear out, but have steadily re-

fused to do so.
