## A Feminine Charm That Lingers

IT makes little difference how long a man has been married, he still is impressed by those feminine charms of his wife which first attracted him. One such attraction which impresses most men is the soft, smooth loveliness of a woman's hands.

In compliment to a majority of the most intelligent modern housewives, it should be said that they know how to retain this important feminine charm. They k now that red, rough and coarse looking hands result from the use of a poor grade household soap which irritates the skin.

Realizing this, they select their household soap as carefully as they do their toilet soap. And this sort of care has led thousands of thinking housewives always to insist upon Kirkman's Soap. . . .

TTIRKMAN'S Soap is as harmless to the hands as A is the most exquisite toilet soap. Being free from irritating lye, it will not harm the skin or injure the most delicate fabrics. Only the finest materials are used in making Kirkman's Soap.

For the sake of your hands insist upon Kirkman's.

### **Public Saves Money** Because of Our Location

"Overhead" Expenses Are Very Small

There is no mystery about Garber Brothers low prices and one of the factors that has made these low prices is the low overhead expense involved in the manufacture and selling of furniture at our factory at Morgan and Market Streets.

At Garber Brothers you will find no expensive store front. In fact, the factory atmosphere of our display room reflects the low cost of conducting our business.

You know, of course, that factory locations are much less expensive than stores on the main streets and that factory overhead expenses are proportionately small. There is every reason why you should come 800 feet from Main Street in order to buy quality furniture at wholesale prices. Being located in a factory building does not detract from the quality of our merchandise but it DOES SUBTRACT FROM THE PRICE YOU PAY,
