Drivers of courtesy need only a horn toot to make way for the car behind. The other style of driver needs the traffic cop and the sooner the cop gets into action the more Do You Remember the Days When Lys regular will driving become.

GOTHAM AND GOPHER PRAIRIE

Whatever else the convention in New York did, it dem-York is still a part of the U. S. A. and after all is not so much better, worse or different from those innumerable cities, towns, villages and hamlets aspiring to its position as America's greatest metropolis.

Delegates like all folks are more or less wrapped-up in clothing and could not have helped noticing that the New Yorkers dressed their shop windows and themselves in the same Finebilt clothes they themselves wear back in Walla Walla and Hannibal, that the New York consumption of summer furs was no larger than that of all the other New This and New Thats in the country, and that women wore just as little clothing on Broadway as they do on Main

Other things which the visiting delegates must have found existent in New York as well as at home were traffic congestion, a court house, a post office, overcrowded street cars, auto-dodging pedestrians, churches, playgrounds, radio stores and concerts, Greek restaurants and confectionery By WALTER P. CHRYSLER 85,000 to the winning automobiles in and prophesy another world catastores and concerts, Greek restaurants and confectionery stores, a progressive younger generation and a reactionary older generation, Favorite Sons, policemen, reformers, press agents, street parades, bill boards, Hearst newspapers and high priced hotel facilities.

Yes, the rest of the United States learned from the Democratic convention that it has much in common with the nation's city of skyscrapers.

By WALTER P. THRYSLER

ally, of a click for every spark it the cylinders.

To some extent this can be shielded off by surrounding the magneto or spark coil, the high tension winding and the outer ends of the spark plugs with a grounded metal screen. But this is not an easy procedure for the unskilled mechanic. Fortunately, the most fun out

of auto radio comes in stopping somewhere and listening while you enjoy the scenery or the cool air of the country. There is no interference of course, while the engine is not running.

about what you would expect it to from the name. It is a circuit that is turned back upon itself. One and the same path, through a part of the set, is followed by both the radiofrequency oscillations and the Remember that we discusse in the Primer two days ago what these two are. The radiorequency oscillations are thos that enter the set from the antends. The audio-frequency oscillations are the much slow er ones produced in the set by the detector. Suppose, now, that we have

simple reflex circuit consisting, let us say, of one vacuum tube and a crystal detector. The radio frequency oscillations come in from the antenna and are put through the vac num tube. This amplifies them. They go next to the crystal. Here they are "detected", that is the audio-frequency oscillations corresponding to the message carried by the radio wave is removed from the radio-frequency oscillations. The audiofrequency oscillations come into being as an independent Now for the reflex part. These audio-frequency oscillations are run back by a special arrangement of circuits)
through the same vacuum tube
that the radio-frequency oscillations went through. This
gives double amplification with one tube. The two oscillations radio and audio, are so far apart in frequency that they do

T. PETERSBURG is among the first ten cities of the United States from the standpoint of rapid increase in population. It is the leading winter resort center of the West Coast of Florida and is rapidly forging to the front as one of the most attractive permanent residential cities of the United States. New construction to the value of \$7,000,000 was carried on during the year 1923, which included six new hotels, many apartment houses and hundreds of new homes. Here indeed is a wonder city and the chief attraction for the 100,000 people who visited it last year is its unmatched climate. The sun shines an average of 360 days each year Repayless of its tremendously rapid growth, St. Petersburg is just coming into its own.

rapidly and values are increasing likewise.
