

TO THE DEVOTED MONTHLY PAPER INTERESTS OF GOOD HEALTH.

"PUBLIC HEALTH IS PUBLIC WEALTH

Vol. I. - No. 10.

HIGHLAND PARK, CONN., JULY, 1887.

50 Cents a Year.

It's horid sounds, and its polluted air,
And where the season's milder fervors beat,
And gales, that sweep the forest borders, bear
The song of bird and sound of running stream,
Am come awhile to wander and to dream.

EVEN LOVE.

For the Highland News.

HIGHLAND PARK, June 15, 1886.

HIGHLAND PARK, June 15, 1886.

MY DEAR EVELINE:
At last we are settled in our new Highland home, and I am very anxious to have you come and enjoy with me the beauties of nature; the lovely green hills and vales and the glad sunshine. Then, too, I wish you to partake of that fountain of immortality, Tonica Water! It is a positive cure for all ailments! Now you will come? Write me as soon as you receive this that you will come and spend a month with

Your devoted "Amy."

The recipient of this epistle was

"A fair and gracious form, She seemed a queen who ruled o'er gods and men; The majesty of perfect womanhood."

a young, tall, and stylish girl with clear-cut features, dark, wistful eyes, and a face as smooth and white as ivory. Her palor en-hanced her beauty; but she looked as fragile as a slender lily.

Ask of anyone in New York, Who is Eve-Ask or anyone in New York, Who is Eve-line Turner? and your inquiry will be met with open-eyed astonishment. "Why, is it possible you do not know? She is the belle and the 'catch' of the scason," will be the inva-

riable reply.

And so she is, in sooth. Not only rich in all the charms of perfect womanhood, but with a purse clinking with golden guineas.

And yet Miss Turner is not happy; she is listless and passionless. The cause of her listlessness is not known to the world. can see no reason why she should not be the gayest of the gay, and therefore it considers her so. Will you learn otherwise? Then read Eveline Turner's reply to Amy Chatham:

MY DEAR AMY:

My DEAR AMY:

Your cordial note has just been received, and in order to explain fully why I do not think it would be practicable for me to accept your kind invitation, I will write you at length and confide in you a secret.

Amy, chère amie, I do not lightly esteem the efficacies of Touica Water, nor the invigorating qualities of Highland air; but I am assured there is no cure for a "heart bowed down with grief and care" as mine is. I am no longer good company, and would only depress and dispirit you should I accept your hospitality.

no longer good company, and would depress and dispirit you should I accept your hospitality.

As we women are the cause of all manly troubles, so a man has been the cause of all mine. The handsomest man! "His face made sunshine in a shady place."

I met him almost a year ago, and, if you do not believe in "love at first sight" take me as a living example. I met him at the open, "Trovatore" was being performed. Mr. St. James brought him to our box between the first and second acts, and Maurico lost all attraction for me instantly. Even his name is delightful — Gerald.

He looked at me a great deal, but did not say much, and I was aware that, although many others were assembling in the box, and it was rather too crowded, he still remained in one corner, gazing at me with an excession that thrilled me. He came again after each act and always was the last to leave. I did not see him as we left the house, but his image was inpressed upon my heart.

What was my astonishment when, a few days afterwards, I received a note from Mr.

St. James asking permission to bring a friend of his,—Mr. Gerald Gramercy,—to my house. He wrote that he had the pleasure of presenting Mr. Gramercy at the opera a few evenings previous, and that Mr. Gramercy would consider the privilege of calling upon me as the dearest of his life. Mr. St. James also added that Mr. Gramercy was a young man of great affability and attainments. To say that I was in the "Seventh Heaven of Delight" would be drawing it mildly.

in the "Seventh Heaven of Delight" would be drawing it mildly.

My pen, as I replied to the beatific Mr. St. James, cut all the capers of a spring lamb upon the paper, and I ruined several sheets. At length I accomplished one. I sent it. When the appointed evening arrived I was seized with such violent palpitation that I felt sure my heart was affected, and wondered whether it would not be best to call in medical aid. Fortunately I did not! Suppose I had done so, and the physician had discovered that the palpitation was due to Gerald Gramercy? I said nothing to mamma and papa, although they inquired several times why my face was so flushed.

so flushed.

They were both going out to Mrs. Mason's reception, and they left about half past eight. When they were gone I tried to compose myself to read, but I saw nothing but the words "Gerald Gramercy" on the page and gave it up in despair.

At length the bell rang, and I sprang almost across the room. Charles brought in two cards, but both of them read "Mr. Gerald Gramercy" to me.

when he — my Gerald, entered the room, I felt my face grow hot and I knew I was blushing frightfully.

On the joy of that evening! Mr. St. James was obliged to leave early, and my Gerald and I were left alone.

He told me he loved me and, — I could not help it — I told him my love. A few weeks after this we became engaged, without my parents' knowledge though, for you know how stern and exacting they are, and then everything for me was coulsur de rose. Oh what

days were those! At length one evening he was to dine with us, and we were to brave my parents' ire, and implore their sanction.

The hour arrived but not the man, and, would you believe it. Amy, I have never seen him since, and my heart is broken!

Now judge would I be a pleasant companion?

Your dispirited,

"EVELINE."

This letter was very surprising to Amy Chatham. The last time she had seen Eveline the girl had been the quintessence of beauty and esprit. However, she would not hear of her invitation being declined, and wrote another and more urgent letter to her friend, and the upshot of it was that, one bright morning, Eve line Turner and her brother Owen bade their parents and New York a smiling farewell, and left for a sojourn among the glowing hills an vales of Nature's sanitarium, the Highlands.

Owen Turner was his sister with the add cion of a short, blech moust, che and some stronger features.

Their journey was a very merry one, ar the gradual change seemed actually to bring little color into Eveline's pallid face.

Miss Chatham was ready to receive them, an never was welcome more emphatic. Mr. an Mrs. Chatham also were most cordial in thei greetings.

Eveline declared at once she was "delighted she had come," and was afraid they might experience some difficulty in getting rid of her.

"How lovely it all is!" she exclaimed, stepping out on the broad piazza, and gazing entranced at the glorious vista spread out before "I'm sure the sun does not shine so brightly elsewhere!" was her next exclamation.

And she had sufficient call for her enthusiasm, for not only was the sun's light more effulgent, and the scenery so grand, but the Chathams' dwelling was most charming. Everything was fresh and new, and looked as though it had just been washed and ironed. The house was very artistic, and the Chathams themselves were most agreeable. Amy was a very bright, gay girl, with a face like a sunbeam.

She was all gentleness, all gayety, Her pranks the favorite theme of every tonoue "

She was short and inclined to be "kittenish." She did not seem to have a spark of sentimentality in her nature; it seemed all to have run to - fun.

She rushed around arranging things for her guests, chattering all the time, and laughing merrily.

"Amy Chatham, if you don't sit down for a moment you will die of exhaustion and ruin my visit," said Miss Turner, and Amy came, panting, across the room and sat down by her.

When bedtime arrived the girls went to the room assigned Eveline for a "good talk."

They had not seen one another for more than a year, and many changes had taken place in both, which drew forth comment from the other. Eveline was taller, slighter, and more

"Tell me Evey," said Amy, "what have you done with your bloom?

"You have stolen it, I fear," returned Eveline.

'Tonica Water Tonica Water!" declared Amy, "it is my 'bloom of youth.'

"Oh! it is all very well to say that Tonica Water is such a restorer; anything is healthful to a mind at rest; but do you pretend to intimate that Tonica Water would benefit me, Amy?" and Eveline shook her head sadly.

"I'm sure of it. Tonica Water mixed with Time.

'Please don't joke about it. Amy: I am very unhappy," and Eveline sighed mournfully.

"Tell me all about it; about him - Jeremiah or whatever that romantic name is. Did he come to you in a suit of armor, with a crested helmet and double-barrel shot gun, and, falling down on his knees, ask you in Quixotic phrases to be his wife? Did he madly exclaim, 'Marry me, or be my wife?'" Eveline smiled in spite

"No Amy," she replied, "he came to me in a suit of broadcloth, with a red rose in his buttonhole, and leaning over my sholder as I sat at the piano, he told me I was very dear to him and said he could not live without

"And you threw yourself into his outstretched arms, and told him he did not have to?" interpolated Amv.

"No, I did not," denied Eveline, "I said 'you may have me, Gerald - I love you." And then he kissed you?"

Eveline did not answer; she had a far away look upon her face as though she were going over that scene again.

Pooh," said Amy, "if he did not kiss you he did not know what was proper, and he should be instructed!"

"But he did do what was proper!" exclaimed Eveline, ever ready to defend her Gerald

Amy laughed.

Oh! Then he did perform the necessary ceremony of osculation? I cannot understand anyone being remiss in that."

'Amy, cease!"

Well, then, when he had gone through that shocking ceremony, what did he do?

"He told me how much he loved me!" "Pshaw! He told you that the first time he was at your house?

"Oh, not only then," put in Eveline hastily. "Mercy! Couldn't he find something new

to say ?" demanded Miss Chatham. "No, that was the topic which absorbed him.

"There was the weather," suggested Amy. "There was no weather," replied Eveline.

"Oh, excuse me, I was under the impression there was," said Amy apologetically. "Well, there was literature.

"I was the only book he cared to peruse."

"Art then ?"

"We were artless."

"Religion ?"

"I was his divinity."

"Well, I see there was absolutely nothing else for him to talk about, so he talked about you," concluded Amy.

'So it seemed," answered Miss Turner.

"Well, and did you talk about yourself also ?" asked Amy.

"No. I talked about him."

"Oh, dear! What an edifying conversation it must have been! Mr. Gerald Gramercy setting Miss Eveline Turner on the pedestal of his Divinity, and Miss Eveline Turner hurling down his Divinity and lifting her's, Mr. Gerald Gramercy, into its place. How I should have enjoyed seeing it all!" And Miss Chatham burst into a merry peal of laughter.

"Oh, don't, Amy," besought Eveline, pite ously; "let us change the conversation. came here to forget Gerald Gramercy; let us never again speak of him."

"No, no, it is so romantic !" pleaded Amy. "A beautiful female pining for a lost love ! Oh, it is just delightful, Evey, dear !"

"Is it, Amy?" asked Eveline, reproachfully.

"Indeed it is. Tell me some more. Have had to comply. you no idea why he disappeared?'

"Not the slightest, and papa and mamma have never mentioned his name. though, asks about him frequently."

"And can't you imagine where he his?"

"No, I cannot. It is a cruel fate!" and Eveline looked as though she might be going

"Don't you think you could content yourself with some one else ?" inquired Miss Chatham.

"Why, what's the matter? There may be no more Gerald Gramercies, but you might find a Reginald Montmorencie; how would he do?

"Amy! have you no sentiment in your composition?'

"I don't know. I have never analyzed my composition, therefore I am not aware of its component parts.

"Are you not the least bit in love with someone?" Eveline asked.

"Very much in love with someone."

"Whom?" asked Eveline, leaning eagerly forward.

"It's a girl," said Amy, hesitatingly

"Pooh," returned Eveline; "yourself, I suppose; but is there no man, Amy, some Apollo, with godlike form, who has touched your stony heart ?'

"Well, the minister boxed my ears the other day, but he did not touch my heart, No, Eveline, no Apollo with godlike whiskers has ever inspired anything but ridicule in my dormant heart. By-the-by, I am so glad Owen came with you."

Eveline smiled. Owen had been wonder fully anxious to come.

The next morning broke bright and fair, and Eveline declared she had never seen such grand scenery in her life.
"But where is Amy?" she asked of Mrs.

Chatham, when breakfast was announced.

"She went to show your brother the stable," explained Mrs. Chatham. Soon they returned, and Amy was wreathed

in smiles

The morning was spent in driving. Amy exhibited to her guests all the wonders of the picturesque place, and they took their first taste of the Fountain of Immortality - Tonica

Water. "Now," said Eveline, as she raised the glass to her lips, "sorrow, depart! Fly before the mighty foe!" and she laughed incredulously, Now, Amy, we will see what effect your charm will have upon me."

"It has rather an agreeable flavor," said Owen, with the air of a connoisseur.
"Of course it has!" replied Amy, smack-

ing her lips.

When they returned from their drive, Eve.

line was actually rosy.
"Tonica Water!" said Amy, confidentially. When dinner was announced, Eveline asked again as to the whereabouts of Amy.

"Gone to show your brother the stable," explained Mr. Chatham.

Eveline smiled. Strange he could not find his way there alone !

She was on the piazza when they returned; Amy was again smiling, and Eveline heard her dub her brother a "goose."

"You seem to enjoy the stable, Owen,"

she remarked, placidly.
"Only the stable, is it not, Mr. Turner?" asked Amy smilingly.

"Yes, only the stable," assented Owen, gruffly.

Several days glided on; days fraught with pleasure. Such excursions as they had! Such rides! Such drives! Never had time passed more pleasantly. As Owen and Amy visited the stables frequently, Eveline was often left to herself. Time never hung heavy on her hands though, for she wandered around alone enjoying the lovely scenery and brightening under the invigorating air.

One day, although Owen and Amy had

been twice to the stable since breakfast, Owen desired to go again, and Amy, as a hostess,

"Going to the 'stable,' I suppose ?'" called Eveline from the drawing-room window

they passed.
"Yes," replied Amy, "Mr. Turner does not know the way, and I am showing him.

"Amy, I wish you would not jest," said Owen in a low tone, when they were out of hearing of the house. "Will you never listen to me reasonably ?'

"Yes, certainly, when you have anything reasonable to say.

"Is it not reasonable when I say I love

"Whoever heard of anyone loving with reason? Is human love the growth of human will? Am I not poetical, Mr. Turner?

"I wish to heaven you were, Amy!" he said bitterly. "Is it just the same to you whether a man tells you he loves you, or scoffs and jokes forever?"

"No, certainly not the same, I prefer the the latter," said Miss Amy, defiantly.

"Will you love me, Amy, if I talk nonsense to you ?"

You never talk anything else to me," and Miss Chatham climbed placidly to the top of a rail, and sat as comfortably there as though it were an upholstered chair, looking at Owen, with her head perched on one side.

Owen leaned against the rail, and sought to take her hand.

"Let that alone!" commanded Amy, snatching it away.
"Will you not let me hold it, Amy?"

"No; why should I? "Because I want to so much!" returned Owen, pleadingly.

"Do I let you do everything you want to?" asked Miss Chatham.

"No, nothing," returned Owen, bitterly

"Do you know what would happen if I id? You would probably be holding both hands, with an iron grasp, shouting loverash from the house-tops, and, and - kissme, wouldn't you ?" eveing him askance.

"I'm afraid so," answered Owen. "It would be wise then, would it not, for e to let you do everything you want to

"The wisest thing you could do." "I hate wisdom," tossing her head.

"But you say I am foolish," argued Owen. "I hate foolishness too."

"Is there anything your majesty likes?" "Yes, I adore sitting on a rail," and Amy miles mischieviously.

"Well, sit here as long as you like," and Owen swung himself up beside her. "Thank you; but I prefer sitting here

"Well, you are alone with me."

"Yes, but I'd rather be alone with someone

"Shall I leave you ?"

"Yes, please.

the house. When he had gone a few yards he looked back.

"Do you really mean for me to go, Amy?" he asked reproachfully.

"Yes, Mr. Turner." Owen came back.

What will you do if I stay ?" he asks.

"Ignore you.

"And what if I go ?"

"Love you."

"But hang it Amy, I can't leave you!"
"But hang it, Mr. Turner, I can't love

"Not even if I go ?"

"Well I might if you went and never came "Well, I will do that under one condition."

"Which is ?

"That you will come to me."

"You might possibly get tired waiting,"

uggests Amy.
"That is nothing; the end would justify the

means," returns Owen. Very well; go and wait," waving her hand imperiously.

"Where?"

"Wherever you will be most comfortable. You may have to wait some time.'

" Time flies."

"It seems to me it's dragging most slowly at present," and Amy yawns.

"Do you really think so, Amy, dear?" asked Owen softly.

"Mr. Turner, there are several expressions in that sentence to which I object."

"What?"

"Well, in the first place," checking them off on her fingers, "there is an insinuation against my veracity; in the second place you omitted the prefix assigned to my name, and in the last place I may be 'dear'-I believe papa finds me so - but if I have ever cost you anything I was not aware of it!'

Yes, Miss Chatham, it is true; you have

cost me a great deal."

" Papa will reimburse you."

"You have cost me many a pang. Can he reimburse me for that?"

"I don't know anything about pangs."

"Except how to inflict them.

"I'm a dreadful wretch, am I not?" with a

You are indeed," assented Owen.

"And you hate me?"

" No.'

"Oh, fie! you surely would not love a criminal?"

"Does not the Bible teach us to love those who hate and despitefully use us?

Well, then; if you hate and despitefully use me it will be my duty, as a Christian, to

"We are also commanded to love our neighbors as ourselves," suggested Owen.

"But we are not neighbors; you are my guest.

"Well, the laws of etiquette then, require that we treat our guests politely." "So you wish to insinuate Mr Turner

that I am not an agreeable hostess?" with much hauteur.

"You might be more cordial" ventures Owen. "I am sure Eveline finds me most cordial."

" Eveline may find you many things which Eveline's brother does not." "Indeed? Then why, may I ask, did Eveline's brother come with her on her visit?'

demanded Eveline's brother's hostess.

"Because Eveline could not come alone." "Then you did not wish to come?" banter-

ingly. "Amy, you know I wished to come! How can you ask? Do you think I could bear all this if I had not wished to come? Do you not know how I love you?'

"Really, Mr. Turner; so many questions. Where shall I begin to answer? Do I think," mockingly, "that you could bear all this if you had not wished to come? I don't know what 'all this' implies, and you as good as

told me you did not want to come. "O Amy! stony-hearted! You are most cruel!" And Owen kicked angrily at the mil

And Owen kicked angrily at the rail. Amy had not been holding on, and her seat was very insecure, and the kicking did the rest. She would have fallen to the ground had not Owen's arms clasped around her waist. He held her way over the rail, as far as his

arms could reach, she struggling to get back.
"Oh let me go!" she cried. "I will fall!" "I will not let you go until you hear me out," answered Owen firmly. "I love you. Amy, love you dearly. Is there nothing that will make you love me? Think of something,

if you cannot I will let you fall!" Or, Mr. Turner - Owen! Take me up -

I'm falling!" struggling. "No, no; not till you think of something." "I know of only one remedy for all ills,"

still struggling.

"What is it?" "Tonica Water!"

"Will it have the desired effect?"

"If anything will. Oh, please take me

Owen drew her tenderly to him, and she sat erect once more,

"Remain here for a moment," he said, and ran off towards the house.

Presently he returned with a goblet in his hand.

"What is it?" she asked.

He handed her the goblet; she put it to her lips, then, with sparkling eyes, drained the last

"Do you love me, Amy?" he cried, eagerly seizing the goblet.

"I - I am afraid I - do, Owen," bashfully, "Oh, Tonica Water!" cried Owen, clasping his hands.

"It never fails!" added Amy. "Even in love."

Now that Owen and Amy were become engaged, Eveline was left very much to herself, and she spent the time wandering about in solitude. Her health was greatly improved, but there was still the pressure upon her heart; that was not so easily overcome. Their visit had already lasted two weeks, but Owen was very reluctant to go home, and Eveline was not disinclined to prolong the visit. Then, besides, the Chathams would not hear of their going.

It was a beautiful afternoon, when Eveline. with a book in her hand, strolled off for her favorite nook, under the shelter of a large tree. She was passionately fond of poetry, and she had taken "Lalla Rookh" as a companion. She felt a kindred sympathy for the maiden who "Never loved a tree or flower, but 'twas the first to fade away."

Imagine only, Eveline Turner, the beautiful, the wealthy, resembling herself to that most unfortunate damsel! She had not perused many lines, when she was disturbed by Mr. Miller, a red-faced old farmer.

"How do you do, Mr. Miller?" she asked. closing her book.

"Pretty well, miss. I hope I see you the same.

"I am very well, thank you, Mr. Miller. Your fresh air is doing me good.'

"Yes, miss; I'm sure. Would you like to see something strange now, miss?
"Something strange! What?"

"There's a man over there," indicating a neighboring farm-house, "who says he's seen a vision.

"Seen a vision?"

"Yes; and vision it is if you'd see him with his face like alabaster."

"Where did he see the vision?" asked Eveline, becoming greatly interested in Farmer Miller's story.

"In these parts, he says. He went in that house for a drink of water, and he's lying down, now, with his eyes shut."

Oh! could I not go over to see him, Mr. asked Eveline, springing up. should love to!

"Do you think you ought to?" he asked, hesitatingly.

"Oh, yes; please take me!" besought Eve-

She would not hear of being refused, and walked swiftly across the road, Farmer Miller following. A woman was at the door, with a tow-headed baby on her arm.

Farmer Miller explained their coming.

"He's quiet, now," returned the woman. "Will I disturb him?"

"Yes! ves!" said Eveline, impatiently.

"If you speak so hasty, I won't do it at all!" snapped the woman, who had not an amiable disposition.

Eveline said no more. The woman set off, the baby on her arm, leading the way up stairs, Eveline and Farmer Miller following

She entered a room near the head of the stairs, the others behind her. It was a small, square apartment, with staring, white-washed walls and cottage furniture.

A man was sitting by the window, his back to them.

"Are ye any better?" asked the woman, shortly.

The man arose and turned round. Farmer Miller, the woman, and the baby were almost upset, as he dashed across the floor, and grasping Eveline by the hand, cried "Oh, it was not a vision!"

"Gerald! You here?" gasped Eveline, turning deadly white.

"She's goin' to faint!" eried Farmer Miller. "Leave her to me—she's my promised bride," said the man. "I will take care of

But Eveline did not faint, and the blood began to rush into her cheeks.

'Leave us, please," said Gerald. And Farmer Miller, and the woman with the baby, slunk off with smothered exclamations.

"Gerald, why are you here?" cried Eveline. "I would ask you the same question, Eveline '

"I am visiting.

"I recuperating," answered Gerald. "Eveline, I suppose your father has told you all?'

No, nothing. What is it?" So they sat down on the edge of the cottagebed, and in that happy, little, white-washed

room, Gerald began his story.
"Eveline, dearest, truth is stranger than fiction, is it not?" he began, by way of intro-"How you must have condemned me! Listen. On that night, so long ago, when I was to dine with you, I left my home at five o'clock in order to be with you early. On your door-steps I met your father, and I told him of our engagement. These are his words, Eveline; he caught me by the shoulder, and, I thought, was going to cast me down the steps. You are a fool!" he said. 'How dare you beguile my daughter and persuade her to engage herself without my knowledge? Take yourself off! Do you hear me?' as I 'Your daughter loves me,' was lingering. I returned; 'and I love and respect her with all my heart.' He then called me a madman, and oh. Eveline! made dreadful threats upon you, too cruel to mention, if I ever pursued or held communication with you further. To spare you, darling, I promised to leave the city at once. This is what I replied: 'Mr. Turner, I love your daughter too deeply to bring suffering upon her. I will depart, as you desire; but I give you fair warning that if ever change brings us together, and she still loves me. will marry her in spite of you!' I turned and left. I need tell you no more. When I say you sitting under that tree, in your white dress I was sure it was a vision. Heaven be praised, it was not! And you are mine, Eveline that is, if you still love me."

We will draw a curtain over the rest.

Suffice it to say that Farmer Miller and the woman were a little surprised to see the beau tiful young lady walk off arm-in-arm with the vision-seeing man! But their surprise was nothing to Amy Chatham's, when Eveline, all smiles, presented her fiancée, Mr. Gramercy.

"What do you think of Tonica Water, now?" asked Amy, triumphantly.

Words fail me," Eveline replied.

"It does certainly work wonders," put in Owen, insinuatingly.

A few days after this, a large, printed handbill was posted on the piazza, which Owen tried to appear unconscious of. It read:

What cures all ills of heart or mind? What helps the lame, restores the blind?
What catches beaux for maids who moan?
What melts the heart that once was stone?
Tonica Water!

BE TRUE TO YOURSELF.

Nothing hurts a man more than to seem small and ignoble in his own eyes. It is the slavish feeling that degrades the slave. A base ambition makes the man that cherishes it base. No one can debase you but yourself. Slander, satire, falsehood, injustice-these can never rob you of your manhood. Men may be about you, they may denounce you, they may cherish suspicions manifold, they may make your failings the target of their wit or cruelty - never be alarmed, never swerve an inch from the line your judgment and conscience have marked out for you. They cannot by efforts take away your knowledge of yourself, the purity of your motives, the integrity of your character and the generosity of your nature. While those are left, you are, in point of fact unharmed. - Exchange.

WOMEN AS BUSINESS MANAGERS.

William Cullen Bryant, if we mistake not, said that "wherever women are trusted to manage affairs involving the expenditure of money for useful purposes, they are found to be more economical than men." Ask any mechanic who takes his weekly wages directly to his wife, and makes her the treasurer, and he will tell you that the wife is a far better manager than he would be. Many men in every community owe their prosperity to the good management of their wives; and few men who have tried it have ever regretted making their wives, in the fullest sense, the partners in their business, and the controllers of all the expenditures. It may be said that this is true only where the money to be expended is of small amount; but this is not so. There are not a few wealthy business men who have found in their wives the most capable and wise counselors; and whoever has tried the experiment, even in a large and wealthy household, knows that a woman will make the allowance for family expenses go much further than a man could. We may add that in France women assist their husbands in their business to a much greater extent than here. The glove-maker's wife or daughters, the linen draper's, the ordinary shopkeeper's, invariably help at the counter and keep the books of the establishment. Even in more costly warehouses women do most of the work. Avenues are thus opened to them which, in that country, at least, go far toward solving the woman question. Everybody in France admits, in consequence, that the women are as good at business as the men. As a rule, men spend far more money on luxuries than women. If any man thinks his wife extravagant or careless in money matters, we advise him to divide his income with her, give her a bank account, and let her manage her household affairs, he giving advice when asked. He will presently disover in his wife an amount of tact, care, udgment forethought, and skill in manageent which will greatly increase his admiration of her; and the exercise of which qualities in an independent way, will make her life happier, and largely increase her usefulness as a member of society, and as the educator of her children. If any young unmarried man, who needs a good business manager to help him save money, should peruse this paragraph, let him delay not in obtaining a sensible wife. His fortune will then be more than half made, in more than one respect. -

"Give us your hand, stranger," replied the other, "I just know how you feel. I'm mar-ried myself." — Exchange.

A LIFE ORDERED BY PRINCIPLES.

When I started out in life, I laid down a certain course of action based upon certain principles which seemed to me to be sound. I did not conceive that I was a genius. I was very unlearned. Education, as we now understand it, was wholly wanting to me. But I believed that labor, applied to natural resources, was the foundation of wealth and position. I was a workingman or, better put, a day laborer. I made up my mind that no man in that condition of life who failed to practice industry and self-denial could hope to rise out of the ranks. It struck me as nonsense for a man to think of accomplishing anything in this world who did not have a definite object ahead of him, and who was not willing to undergo all things to attain it. I therefore determined thoroughly to understand all the details of my business. This included a knowledge of the exact cost of everything, and the way to adapt every product of a shop to a fruitful purpose. I de-termined to watch my opportunities with a hawk's eye. I determined to be strictly honest, not only keeping the letter of my contracts and promises, but satisfying everybody with whom I did business by doing every thing in reason that he might ask. I determined to observe the laws of good morals, good habits, to be economical in everything, and to be untiringly industrious. I made up my mind to keep out of lawsuits, and in the accomplishment of what I set out to do simply to defy all opposition, and peg away at it till it faded away. I never lied in my business career: I never sued or was sued: I never knowingly injured a rival business; I never permitted a customer to leave me dissatisfied with my work; I never committed an act of oppression in my life, but with a clear conscience I can declare that I have always rendered the best service to God and my fellowman of which I was capable. - John Roach.

Tur usually sedate Senate witnessed some lively proceedings during the late session of Saturday night. Mr. Vance of North Carolina closed his remarks in favor of the Pacific railroad investigation by quoting as follows an old negro song:

De bigger dat you see de smoke De less de fire will be, And the leastest kind of 'possum Climbs the biggest kind o' tree, De darkey at de old camp-ground Who kin the loudest sing and shout, Is a gwine to rob some hen roost.

CLIPPINGS.

The Bighland Acts.

A monthly paper published in the

INTEREST OF GOOD HEALTH. AT Highland Park, Conn., U.S.A.

Subscription, 50 Cents a Year.

All communications intended for either the business or editorial department of this paper should be addressed to publishers of The Higheand News, Highland Park, Conn.

Rates of advertising arranged by special contract.

THE new post-office at Highland Park supplies a long felt want and is a success financially.

THE contemplated hotel at Highland Park will not be erected until after the railroad question is settled.

Don't fail to notice Price Lists on the last page of this paper. If your druggist or grocer do not keep the Highland Waters, send direct to the Springs.

CALL on Fox & Co., Central Row, Hartford, for fine groceries and bottled goods. Highland Tonica Water will be found in their list of mineral waters.

IT may be interesting to the many readers of The Highland News to learn that during the recent heated term the temperature at Highland Park was many degrees cooler than the weather reports showed it to be in other parts of the country. On July 7th the temperature the Highland Spring Waters were taken, also of Forest Lake. The following figures show the result, viz.: Atmosphere 85°. Forest Lake 75°, Tonica Springs 57°, Rock Springs 50°. These reports, taken in connection with the Analysis of the Highland Waters, are quite important and interesting to lovers of healthful and healing beverages.

To the many inquiries for Hotel accommodations at the Springs, will say, that there is at present no hotel at the Springs, only private residences and cottages. We regret so many are obliged to forego the comforts and pleasure of a sojourn at the Highlands, the benefits of invigorating air and Mineral Spring aters. We kope soon to furnish our readers with some interesting reading matter regarding hotel, railroad, and other improvements.

ARE you going abroad? Take a case of Tonica Water, and avoid the evil effects of a change of water and the dangers of sea-sickness. Parties going to the mountains or shore, if they do not find the Highland Waters, Tonica and Rock, can have them forwarded by express or freight by sending their orders direct to the springs, or to the nearest general agency. See list on the last page of this paper.

It is estimated that there is about twenty-two million dollars' worth of slumgullion sold annually in this country under the head of Patent Medicines and Hair Restorers. Nearly one half of this enormous sum is eventually paid by the consumer for advertising and yet he is far from being well. The "hair restorers" alone are enough to cover the whole of New England with a crop of hair ten feet high and as thick as a cane brake, and yet New England is bald headed to a pitiable degree.

NOTICE.

Travelers desiring Highland Tonica Water, can obtain it off the ice by the glass or bottle, at the following well. known Depot Restaurants:

Armstrong's, Springfield, Mass. Mosely's, New Haven, Conn. Parker's, Willimantic, Conn.

Give your orders distinctly, that may get what you ask for. Highland Tonica Water will be found a most pleas-ant, satisfying, and healthful drink.

LETTERS FROM THE PEOPLE.

BROOKLYN, N. Y., Jan. 11, 1887. GENTLEMEN, - I have carefully observed the effect produced by the Highland Tonica Water in the cases of five patients, and have also had occasion to notice the results of its use in several other instances Of the five patients, three were affected with malarial fever of a severe character, and were also anæmic. One was a case of diabetes mellitus, and one suffered from anæmia and general nervous prostration. I think the water truly named Tonica, for it exerted a decidedly tonic effect upon all these patients. cannot say that it will cure bad cases of malarial fever, though it may, if it is continued long enough, but it certainly put the patients into better position to re. sist the inroads of the disease; and it is certainly a sovereign remedy for anæmia, and is more efficacious in diabetes than any other remedy I have tried. I regard it as outranking Vichy for all kidney diseases. Its chemical constituents would indicate this result. A longer experience may and probably will develop other virtues in this really valuable mineral water. L. P. BROCKET, M.D.

To the Case Brothers,

Highland Park, Conn.

MT. BOWDOIN, DORCHESTER. Boston, Mass., May 2 1887. Messrs. Case Brothers:

GENTLEMEN. - For a number of years I have been troubled with Kidney disorder, and can honestly say that your Tonica Water has done all you recommended, and will cheerfully recommend it to all who are troubled with any kidney difficulty. I am, yours respectfully.

F. B. CUSHMAN, Conductor. Limited Express N. Y. & N. E. R. R

Boston, Mass., Nov. 12, 1886. Messrs. Case Brothers;

South Manchester, Conn.:

GENTS, - In answer to yours of the 9th inst., I am happy to inform you that the Highland Tonica Water has entirely cured me of one of the worst forms of dyspepsia, from which I had been suffering three years. At the time I commenced its use I was forty pounds below my usual weight; could not eat any solids of any kind; and in spite of the best medical aid that money could buy, was gradually growing weaker day by day. I have used three cases of the water, and now enjoy the best of health, in fact am a well man again, and I sincerely hope that you will place this great remedy in reach of all who have suffered as I have.

Most respectively yours

S. L. HOLT.

EAST HARTFORD, CONN., March 15, 1887.

Messrs. Case Brothers. Highland Park, Conn .:

DEAR SIRS - I have used your Tonica Water for the last two summers as freely as well water, and consider it the best mineral water I ever drank. It is used in our home instead of well water all through the heated season. It is needless to say that we have no malaria. Unlike most mineral waters, it has a most agreeable taste, is always cool and sparkling; in fact it will be found a blessing by all who use it. Very truly yours,

H. B. HALE, Editor Weekly Gazette.

OLNEYVILLE, R. I., June 16, 1887. Messrs. Case Brothers:

DEAR SIRS, - I have long since been aware of the positive value of the "Highland Tonica Spring," and am glad to learn that your efforts and enterprise are developing its resources as a contribution to the public health. Since the effective and very satisfactory test I have made of the "Water" by personal use, in my family, and to a limited extent among my patients, the impression I had previously entertained of its virtues has been greatly re-inforced.

The important service to the physical economy rendered by pure water cannot be over-estimated; but, as a matter of fact, we unfortunate mortals know very little of the genuine article. Take almost any sample called pure, an analysis will discover natural or accidental adulteraions, some noxious, some inert, some medicinal. Such elements in suspension or solution, when taken into the system, must produce their logical effects, according to their relative proportions in the fluid, and also the state of the system. The pharmacist and physician prefer distilled water for making solutions, because of its purity, and that there is no risk of unlooked for reactions, or of neutralizing the remedy employed. And experience proves that an article of therapeutic fame in certain morbid conditions is ineffective unless sufficiently diluted with pure water. The "Tonica" is a homeopathic dilution par excellence, - yet more rational and scientific, because it is a combination of remedies instead of the ideal homeopathic single remedy in dilute solution. And its alkaline, mildly aperient, diuretic, and tonic properties are so nicely and perfectly combined that logical and natural good results must follow its use, where indicated. As a beverage, other conditions being favorable, its use must conduce to robust health and long life. The process you employ in bottling it for use unquestionably proves its naturally refreshing properties and tonic effect. Yours very truly,

L. D. McLEAN, M.D.

SPRINGFIELD, MASS., July 2, 1887. Gentlemen, - I have been troubled with the malaria for the past week, and have been unable to obtain relief (although attended by a regular physician) until drinking some of your Highland Tonica Water, when, much to my surprise, I obtained immediate relief. I can recommend it as superior to any mineral water I ever drank. Yours,

A. W. HARRINGTON.

"TONICA "

In pharmaceutic skill, Nature has no rival. Note the analyses of "Tonica Water," and we may say, by the way, that there can be no absolute, exhaustive analysis made of Nature's products, in the present state of our knowledge But in this instance the analysis is as faithful and successful as practicable. Now, who will take the resulting formula and undertake to manufacture "Tonica." Try it. Take pure distilled water as a basis; effect a solution therewith of the given products if you can. Now what have we? — give us a taste. Bah! what sort of villainous compound is this? It re-minds one of Mark Twain's description of the sensible properties of "Slumgul lion,"—a primitive beverage of the Wild West Give it up? I would. Mother Nature has covered her process with "Letters Patent," and fears no "infringement" You might perhaps reproduce Mrs. Winslow's Syrup, but Mother Na-ture's "Tonica" never! The skilled chemist, whose name endorses the formula, would ridicule any effort at imitation. No use. The mysterious subter-ranean laboratory where Tonica is made holds secrets that are not for the "Trade." But the supply cannot fail; that's a consolation. Since the birth of the wonderful healing spring, till now, the issuing stream has known no interruption. Millions can find supply and health in its waters. Let the legions of martyrs to "malaria" use it, and laugh to scorn their great perseit, and laught to sickly and sallow and jaundiced procession of invalids with "caked" livers, with indurated spleens. with engorged or contracted kidneys, and with scarcely an organ of the system nor-mally performing its functions, resort to Tonica, and discover from its effects upon them that life is still worth living. It is a wonderful deobstruent or blood-purifier. This agent acts kindly by opening the natural emunctories, the waste-gates of the body, so to speak, and facilitates the escape of the "materies morbi" from the circulation, from the viscera, and the glandular system. It, with the use of glandular system. It, with the use of pure water like that, for instance, drawn from the "Rock" from the "Rock" spring. will insure internal cleanliness, a very essential condi-

KEEP THOSE BANNERS.

A southern surgeon in the Confederate army, Dr. Thomas O. Summers (who is son of Rev. Dr. Summers of Baltimore and the Methodist Episcopal Church), has these verses in the Jacksonville (Ga.) News-Herald: _

Keep those banners, gashed and gory— Keep them there to tell the story of our deeds on fields of glory— Keep them, keep them, let them rest! Tokens of a valor splendid. Glorious mem'ries with them blended! Keep them, for the strife is ended. Keep them, keep them, it is best!

Keep them, keep them, it is best !

Keep them, we would not unfold them:
Keep them — ye who took them — hold them:
For the cause that first unrolled them
To the battle's breeze is dead.
Keep them, they would only sadden.
If, indeed, they would not madden.
Southern hearts, while yours they gladden.
For to win them thousands bled

For to win them thousands been.

While we hall that generous feeling which would close the wounds now heat Yet this fact is worth revealing.—Southrons do not want their flags!

Not but that we still do love them. But we would not have you move them-Keep the dear old shot-pieroed rags.

Keep the dear old shot-piercest rags.

Keep them, yes, we would not have then Though would now have then There are none who would now wave the To disturb our nation's peace, you to whom they were surrendered, Burying all that sirife engendered.

In return your hearts have tendered.

Keep them — they are in their place.

"MALARIA."

OLNEYVILLE, R. I., June, 1887.

A TALK TO BUSINESS BOYS.

A boy's first position in a commercial house is usually at the foot of the ladder; his duties are plain, his place is insignificant, and his salary is small. He is expected to familiarize himself with the business, and as he becomes more intelligent in regard to it he is advanced to a more responsible place. His first duty, then, is to work. He must cultivate day by day habits of fidelity, accuracy, neatness, a dispatch, and these qualities will tell in his favor as surely as the world revolves. Though he may work unnoticed and uncommended for months, such conduct always meets its reward. I once knew a boy who was a clerk it a large mercantile house which employed as entry clerks, shipping clerks, buyers, bookkeepers, and salesmen, eighty young men, be sides a small army of porters, packers, and truckmen; and this boy of seventeen felt that amidst such a crowd he was lost to notice, and that any efforts he might make would quite unregarded. Nevertheless, he did his duty; every morning at eight o'clock he was promptly in his place, and every power that he possessed was brought to bear upon his work. After he had been there a year he had occasion to ask a week's leave of absence during the busy season. "That," was the response, " is an unusual request, and one which it is somewhat inconvenient for us to grant; but for the purpose of showing you that we appreciate the efforts you have made since you have been with us, we take pleasure in giving you the leave of absence for which you ask. "I didn't think," said the boy, when he came home that night and related his success, "that they knew a thing about me, but it seems they have watched me ever since I have been with They had, indeed, watched him, and selected him for advancement, for shortly after he was promoted to a position of trust with appropriate increase of salary. It must be so, sooner or later, for there is always a demand for excellent work. A boy who intends to build up for himself a successful business will find it a long and difficult task, even if he brings to bear efforts both of body and mind, but he who thinks to win without doing his very best will find himself a loser in the race, and that soon. - American Art Printer.

WATER, ITS AGENCY IN THERA-PEUTICS

BY B. M. LAWRENCE, M. D.

Water is the great agent employed, both by nature and art, in all the important processes of growth and purification, and since forms of disease are caused by or complicated with impurity of some kind, as we have indicated in previous articles, the importance of this element as a curative agent is readily understood. We are therefore not surprised that the renowned fathers of the healing art, including the most eminent physicians from the days of Hypocrates to Priessnitz, have been outspoken in their praise of Water as a valuable auxiliary in the treatment of disease.

Galen placed water in the highest ranks in his materia medica. Celsus advised its use in a score or more of the most obstinate diseases; Hoffman pronounced water a "remedy suited to all persons and all times, and to all diseases both acute and chronic, and also that its use, answers all indications, both of prevention and cure.'

Boerhave left on record that "No remedy can more effectively secure health and prevent disease than pure water." Haller, as evidence of his appreciation of its value, drank nothing but water, and the same is recorded as the habit of Demosthenes, Lock, and Milton, Lancassani in 1753, Caldani in 1767, Leanter in 1780, and Percy in 1785, published conclusive evidence of the superiority of water alone to all the medicated fluids and compounds known for the cure of surgical diseases, and recent experience in the hospitals during the late war between France and Germany fully sustained their conclusions. Dr. Forbes, while editing the ablest medical journal in the world, and royal physician to Her Majesty Queen Victoria, said that "in a large proportion of cases of gout and rheumatism the Water Cure seems to be extremely efficacious," and for "a large number-of complex diseases usually known as chronic dyspepsia, when all other modes of treatment have failed or been only partially successful, the practice of Priessnitz is well deserving of a trial." If the object was to cure the patient at once, as it would be if he was employed by the year as we have suggested, would not the doctor use his best and most successful mode of treatment, before "all other modes have failed."

These eminent practitioners of the regular medical schools are only a fragment of the multitude who have left on record the strongest testimony in favor of water as one of our most beneficial agents in the cure of disease. In order to understand the modus operandi of the water treatment or the relation of pure water to morbid conditions, it becomes neces sary to comprehend its vital relation to the system in a normal or healthful condition, as stated in the following distinct propositions which can be easily remembered.

1. Water constitutes more than one-half of the entire bulk of the body.

2. Water composes more than three-fourths of the whole mass of the blood; more than seven-eighths of the brain, and more than nine-tenths of the saliva and other colorless secretions.

3. Water is the only vehicle by which nutrient matters are conveyed to the blood, and through it to all parts of the body, bearing the elements of growth and repair.

Water is the only medium through which the waste or worn out particles are conveyed from all parts of the body to the excretory organs to be expelled.

Water is the only solvent with which to dilute and prepare for exit from the system the refuse matter in the alimentary canal, etc.

6. Water is the only material capable of circulating in all the finest blood vessels and tissues without causing injury or irritation.

7. Water never produces morbid effects or ill results except from its being used at an improper temperature or from its use in excessive quantities, effects by no means unavoidable

The rationale of the water treatment which has already - since the days of Priessnitz greatly modified and improved the medical practice of every school, will be readily understood, when we remember that diseases are produced by bad air, improper light, impure food and drink, excessive or defective alimentation, indolence or over-exertion, unregulated passions; in three words unphysiological volintary habits. The conditions of the body in disease, the proximate causes against which all remedial efforts are to be directed are, in general terms, impure blood, unhealthy recreations, obstructions in the minute vascular structures, or capillary vessels, excessive action in some parts or organs, deficient action in others, unequal temperatures; in other words, a loss of balance in the circulation, and action of the various parts of the vital mechanism, producing great discord in some portions of it, and more or less disorder in all. The general indications are therefore, to remove obstructions, wash away impurities, supply healthy nutriment, regulate temperature, relax inten sive and intensify torpid action, etc., and what like water and what but water, with its concomitants, oxygen, light, food, heat, or temperature, etc., can answer to these indications. To say that medicinal drugs can answer these indications is sheer nonsense; they may respond to almost any other indications, but to these never. The further uses of water for bathing, etc., will be considered in future articles. - From Hall's Journal of Health.

LITTLE BY LITTLE.

"Little by little," the torrent said. "Latte by Intie," the torrent said,
As it swept along its narrow bed,
Chafing its wrath and pride.
"Little by little," and "day by day,"
And with every wave it bore away
A grain of sand from the banks which lay
Like granite walls on either side.

It came again, and the rushing tide Covered the valley far and wide, For the mighty banks were gone. A grain at a time they were swept away, And now the fields and meadows lay Under the waves, for the work was done.

"Little by little," the tempter said, As a dark and cunning snare he spread
For the young, unwary feet;
'Little by little' and 'day by day,'
I'll tempt the careless soul astray, to the broad and flowery way, Until the ruin is made complete."

Little by little," sure and slow, on our future of bliss or woe. We fashion our future or bils or woe, As the present passes away; Our feet are climbing the pathway bright, Up to the regions of endless light, Or gliding downward into the night; "Little by little," and "day by day."

"THE SANITARY ERA"

Is a paper with a mission. Everything possi-ble, pay or no pay, it will do to extend its "Important Embassy to Man."

Therefore Therefore ANY PERIODICAL OR BOOK IN THE WORLD

may be had of the Publisher of THE SANITARY ERA as low as elsewhere,

Together with a Year of the Sanitary Mrs. into the bargain - of itself about the best value for the times, ever put into a secular publica-tion for one dollar or any other price.

Persons, lay or professional, who neglect THE SANITARY ERA, are keeping themselves in ignorance of unprecedented advances in sanitation, of which that paper is actually the ONLY periodical pioneer. Semi-Monthly: 16 pp.: \$1 a year.

WM. C. CONANT, 84 Bond St., New York.

Indigestion and Headache. SOUTH MANCHESTER, Dec. 22, 1885

Gentlemen, —This is to certify that I have been suffering more or less for the last two years with pains in the stomach, severe headaches, coated tongen, and loss has caused me at times much suffering more or less for the last two years with pains in the stomach, severe headaches, coated tongen, and loss has caused me at times much suffering and expense. I have tried, I believe, every known remedy of medical science, under the advice of many eminent physicians, only finding relief for the time, being advised by them to seek the climate of Caliornia if I desired a radical cure. After some advice on the part of friends and a little hesitation of my own, I made up my mind to try some of your Highland Tonica Water. I have used the bove-described symptoms, and have also increased seven pounds in weight. Please forward me another case, and oblige,

Yours truly,

John M. Carney.

Bright's Disease.

Mr. H. Dwight Lamphear, a prominent merchant of Chaplin, Conn., writes as follows:

CHAPLIN, 26th August, 1885 Chapten, 36th August, 1885.

This is to certify that shout the 1st of May, 1885, I was taken sick and called a doctor who, on examining my case, pronounced it Bright's Disease of the Kidneys, He gave me a prescription, but I grew no better from the medicine. About that time I was advised to try the Highland Tonica Water by Mr. Case. I was in bad shape at the time, and was willing to try anything that would benefit me. I can cheerfully say that it worked wonders in my case, and in a short time after using it I could feel its workings, and I am at present, I think, free from the disease, as I had my nune examined about ten days ago, and they were unable to find any gluonen in it, and the state of Highland Tonica Water. Very respectfully, use of Highland Tonica Water. Very respectfully,

Kidney Trouble Relieved.

Kidney Trouble Relieved.

Boston, Mass., May 25, 1886.

Mesers. Case Brothers, South Manchester, Conn.:

GENTLEMEN,—I have been afflicted with lameness in the region of the kidneys for ten years, caused, I suppose, by a strain in over-litting; at times the pains would extend down my left side and limb to the instep. Your agent, Mr. Nutting, called my attention to Tonica Water, and advised me to trylt. I commenced about four weeks made to the company of the company of

Catarrh.

Highland Park, Conn., April 8, 1887.

Highland Park, Conn., April S, 1881.

The Highland Springs Co.;
Genra-Ti gives me great pleasure to give my testimony for the High-giving Tonica Wafer. I have been afflicted with that very disagreeable complaint, catarria, which in my case, I believe to be hereduary. Thave been to great expense in trying the many advertised cares for the same, but have in every case failed to find a cure. I commenced using the Highland Tonica Water, and in less than one month's time I experienced great relief, and I lintend to continue using the water, believing that it will affect hasting cure, and it has really proved a superfluous fat, and I believe it to be the best and purest remedy that can be found for these my complaints, and I give it my hearty indoorsement. Please send me another case of fifty bottles, and oblige.

Yours respectfully, WM. W. WHITE.

Catarrh and Rheumatism.

Catarrh and Rheumatism.

South Mancheter, Dec. 16, 1885.

Gentiemen, Deing an early believer in Highland Poulea Water. Being an early believer in Highland to what it has done for myself and family. Since I commenced using the water my general leath has much improved, my kidneys righted up, my old catarrhal difficulty disappeared, and malaria conquered. At times, for many years, my wife has had severe attacks of rhenaulty disappeared, and malaria conquered. At times, for many years, my wife has had severe attacks of rhenaulty disappeared, and malaria conquered. At times, for many years, my wife has had severe attacks of rhenaulty disappeared, and malaria conquered. At times, for many years, my wife has had severe attacks of the malariance of the Tonica Water. I gives a supplied to the tonica Water. I give a little with the condition of the tonica water. I give a little water water and the tonica water is a supplied to the tonica water. I give a little water w

HARTFORD, CONN., April 14, 1887.

Mesers. Case Brothers:

Gentlemn,—The Highland Tonica Water, of which I have used a considerable quantity during the past year has, I believe, been of besefit to me and has fully borne out the recommendation given me of it. I shall continue to use it, and have just given an order for more. Respectfully, STEPHEN BALL, 106 Park St.

Sirs, - I have been using the Highland Tonica Water, and bind it a most excellent remedy for malaria, and cheerfully recommend its use to those selflicted with that uncomfortable, debilitating complaint. Yours truly, North Manchester, Ct., Feb. 1st.

Kidney Affection and Malaria.

Mesers. Gase Brothers:
GENTLEMEN.—If I withheld my praise of Tonica
Water, I should be an ingrate.
About one year previous to October 15, 1885. I had
been subject to attacks of malaria. Medicine seemed to
check it only to return worse than ever, besides having
all the time from one to three boils, a most angravaged
case of chronic mean claterth, a constant growing tendency to the worst form of piles, and, worse than all
else, a serious kidney trouble, bordering on Bright's
disease. I had kept up simply through strength of
will, hoping that the change of season would bring
relief.
When you told me that you felt certain thest.

disease. I had kept up simply through strength of will, hoping that the change of season would bring relief.

When you told me that you felt certain that Tonica Water would cure me, I must frankly-say that I accepted your assertion with a great deal of merhal reservation, and in the control of the control

A Beneficial Tonic.

SOUTH MANCHESTER, CONN. April 28.

Mosers. Case Brothers.
Gastieven, -After my eickness has wing
gain strength very fast, but seemed to be
something strengthening. I tried reveral be
Highland Toulice Water and bound it quite
I heartly recommend it to any one to hered
Yours respectfully.

Seeme

HIGHLAND

TONICA WATER.

	-

The water contains also Carbonic Acid Gas in solu-tion, and is alkaline.

ROCK WATER.

The Climax of Table Waters.

FLOWING FROM A NATURAL SPRING, HEALTHFUL, INVIGORATING, REFRESHING, PLEASANT TO THE TASTE,

UNEQUALED IN QUALITY, AND UNPARALLELED IN PURITY.

It Tones the System and Prevents Disease.

Read the following Analaysis:

Massachusetts Institute of Technology,
Boston, September 12, 1885.

CASE BROTHERS, Gentlemen:

I have examined the spring water you sent me, and beg to submit the results: The results are expressed in grains to the U.S. Gallon:

Silica,	0.406
Alumina,	0.023
Carbonate of Lime,	0.770
Sulphate of Potash,	0.075
Carbonate of Potash,	0.075
Chloride of Sodium,	0.315
Carbonate of Soda,	0.169
Carbonate of Magnesia,	0.180
Volatile Matter of Water,	0 583
Total solids left upon evaporation,	2.596

The water is very pure and admirably adapted thinking purposes. It is unusually free from Ammoniand nitrogenous substances, furnishing upon analysis:
