THIS HOSPITAL IS DEDICATED TO THE  
MEN AND WOMEN OF  
THE TOWN OF MANCHESTER  
WHO SERVED THEIR STATE AND COUNTRY  
DURING THE WORLD WAR OF  
1914 - 1918

# An Idea—Its Fulfillment

## What Type of Memorial?

THE IDEA of a Memorial was conceived during that wildly exciting parade which followed the news of Germany's surrender and the announcement that the World War was over.

No one in Manchester will ever forget that parade to Depot Square and back on November 11th, 1918. It was a riot of joy!

Yet in the midst of all the tumult and shouting a meeting was planned to consider what would be the most suitable Memorial to the Manchester men and women who answered their country's call during the World War.

Then in January 1919 came that enthusiastic meeting of the people who were interested in erecting a Memorial, at which there were present not only men who had been prominent in war work in this community, but also representatives from every activity in Manchester.

## Hospital Most Fitting

There were discussions by little groups of citizens. There was general discussion in which many participated. It was a gathering in which all felt the responsibility with which they were charged. And then out of a clear sky, during a momentary period of silence, came the suggestion that a Hospital would be the most fitting Memorial possible.

The general approval with which this suggestion was met, and the prompt appointment of a Committee to investigate costs, secure option on a site, and work out details for approval, is a matter of record.

Soon after this meeting the Committee reported that a proper building could be built and equipped for approximately \$75,000, and it recommended that \$75,000 more be secured as an endowment fund.

## Drive Nets Nearly \$200,000

When the people of Manchester were asked for this money there was not one dissenting voice. Never in any of the war drives was more enthusiasm shown. Never was money more quickly subscribed by rich and poor alike than during the Manchester Memorial Hospital Drive of 1919. Instead of \$150,000, nearly \$200,000 was obtained.

## Appropriate Site Chosen

The present site of the Hospital was chosen as appropriate and desirable for the institution, because of its convenient location, healthfulness, abundant room for growth, the splendid view afforded of Connecticut's beautiful hills and valleys, and other definite advantages it possessed.

Next arose the question of whether to build during the high prices then prevailing, or to wait for a possible reduction in costs at some future time.

## Work Started in 1919

Again the sentiment of the people was unmistakable. They wanted the Manchester Memorial Hospital erected at once. Construction was started in 1919. The cornerstone was set in place November 22, 1919, at which time prayer was offered by the Rev. P. J. O. Cornell and an address was delivered by the Rev. W. J. McGurk.

The first rough sketch for a Hospital building was drawn by Dr. D. C. Y. Moore and Mr. C. Elmore Watkins, after these gentlemen had visited a number of leading New England and New York institutions.

This sketch, with a few minor changes, became the basis for the plans of the present Hospital building, which has been highly commended by visiting medical men and hospital superintendents as one of the finest structures of its size in the country.

## Dedicated November 11, 1920

When the Hospital building was completed, on November 11, 1920, exactly two years after the signing of the armistice with Germany, appropriate exercises were held in the new structure.

The crowd that attended the official dedication and opening was probably one of the largest ever assembled in Manchester. All afternoon and evening throngs of people passed through the Hospital until the visitors became so numerous that it was necessary to send them through in relays. Exclamations of pleasure and pride came from everyone.

## Trees Planted Along Driveway

On this day of days, the Army and Navy Club of Manchester planted young trees at regular intervals along the front driveway—a tree for each man who lost his life in the service.

And soon these mute sentinels, on guard along the approach to the Hospital, will lend their foliage and welcome shade to beautify the grounds of the Manchester Memorial Hospital. For many years they will serve to remind us of those who paid the supreme sacrifice.

Laying the cornerstone was an impressive ceremony at which Manchester paid homage to its boys who gave their merry youth away for Country and for God.

# Service Its Slogan

## Its Function Defined

EDWARD W. BOK, in a recent article, asks, "What is the greatest word in the English language?"

"It is the one word which, functioning in its fullest sense, would set at rest the world's problems. It isn't Love. It isn't Brotherhood. It isn't Friendship. It is a word that embodies the spirit and the meaning of all three of these words.

"The word is: Service. Not the service that serves self, for, like lip-service, that accomplishes naught. But service in the true and intended meaning of the word—the service that labors for the interest of others, that confers an advantage, that benefits, that avails. Then we give the greatest, highest, and most directly profitable service to ourselves."

The major problem of our Eastern industrial communities is bridging the gap that quite naturally exists between our many racial groups, and welding them into a single throbbing unit with a common ideal, common aim, common loyalty, mutual understanding and good-will. Some call the problem Americanization; others assimilation. But whatever its name, the only solution is service.

## Comforter of the Distressed

In the Memorial Hospital, Manchester has one of the most effective agencies for helping to solve the problem that can bless a community. It performs the greatest act with which God privileges mankind; it Serves. Compassionately as a loving mother, it gathers to its breast our sick and injured, our expectant mothers, unmindful of race or creed, ministers to them with all the skill and resources of medical science, relieves them of their worries, assuages their pain, comforts them, serves them, and finally sends them out again strong, happy and fit to do their share in the service of Manchester.

During the four years that the Hospital has functioned, it has been possible, thanks to the splendid spirit of co-operation of the medical profession, to build up an organization that is ready day and night to supply to the people of our community the finest medical and surgical treatment, the most careful nursing, and the use of the most efficient scientific equipment such as a modern institution like our Memorial Hospital can offer.

## Staff Highly Efficient

On the resident and visiting Staffs of the Hospital are forty-eight eminent and experienced physicians and surgeons, all of whom devote many hours each week to its service. They are assisted in their work by an administrative staff headed by a Superintendent of vision, wide experience and proven ability, and by a corps of highly efficient graduate nurses. And in the background is a host of unseen workers, who perform to the best of their ability the almost countless tasks which

Automobiles come and go  
—an almost unending stream  
of patients, attending doc-  
tors, and visiting friends.

A corner of the convenient,  
well-appointed reception-  
room for visitors.

In the Board of Trustees room much thought  
and time are given to increasing the usefulness  
of the Hospital to the community it serves.

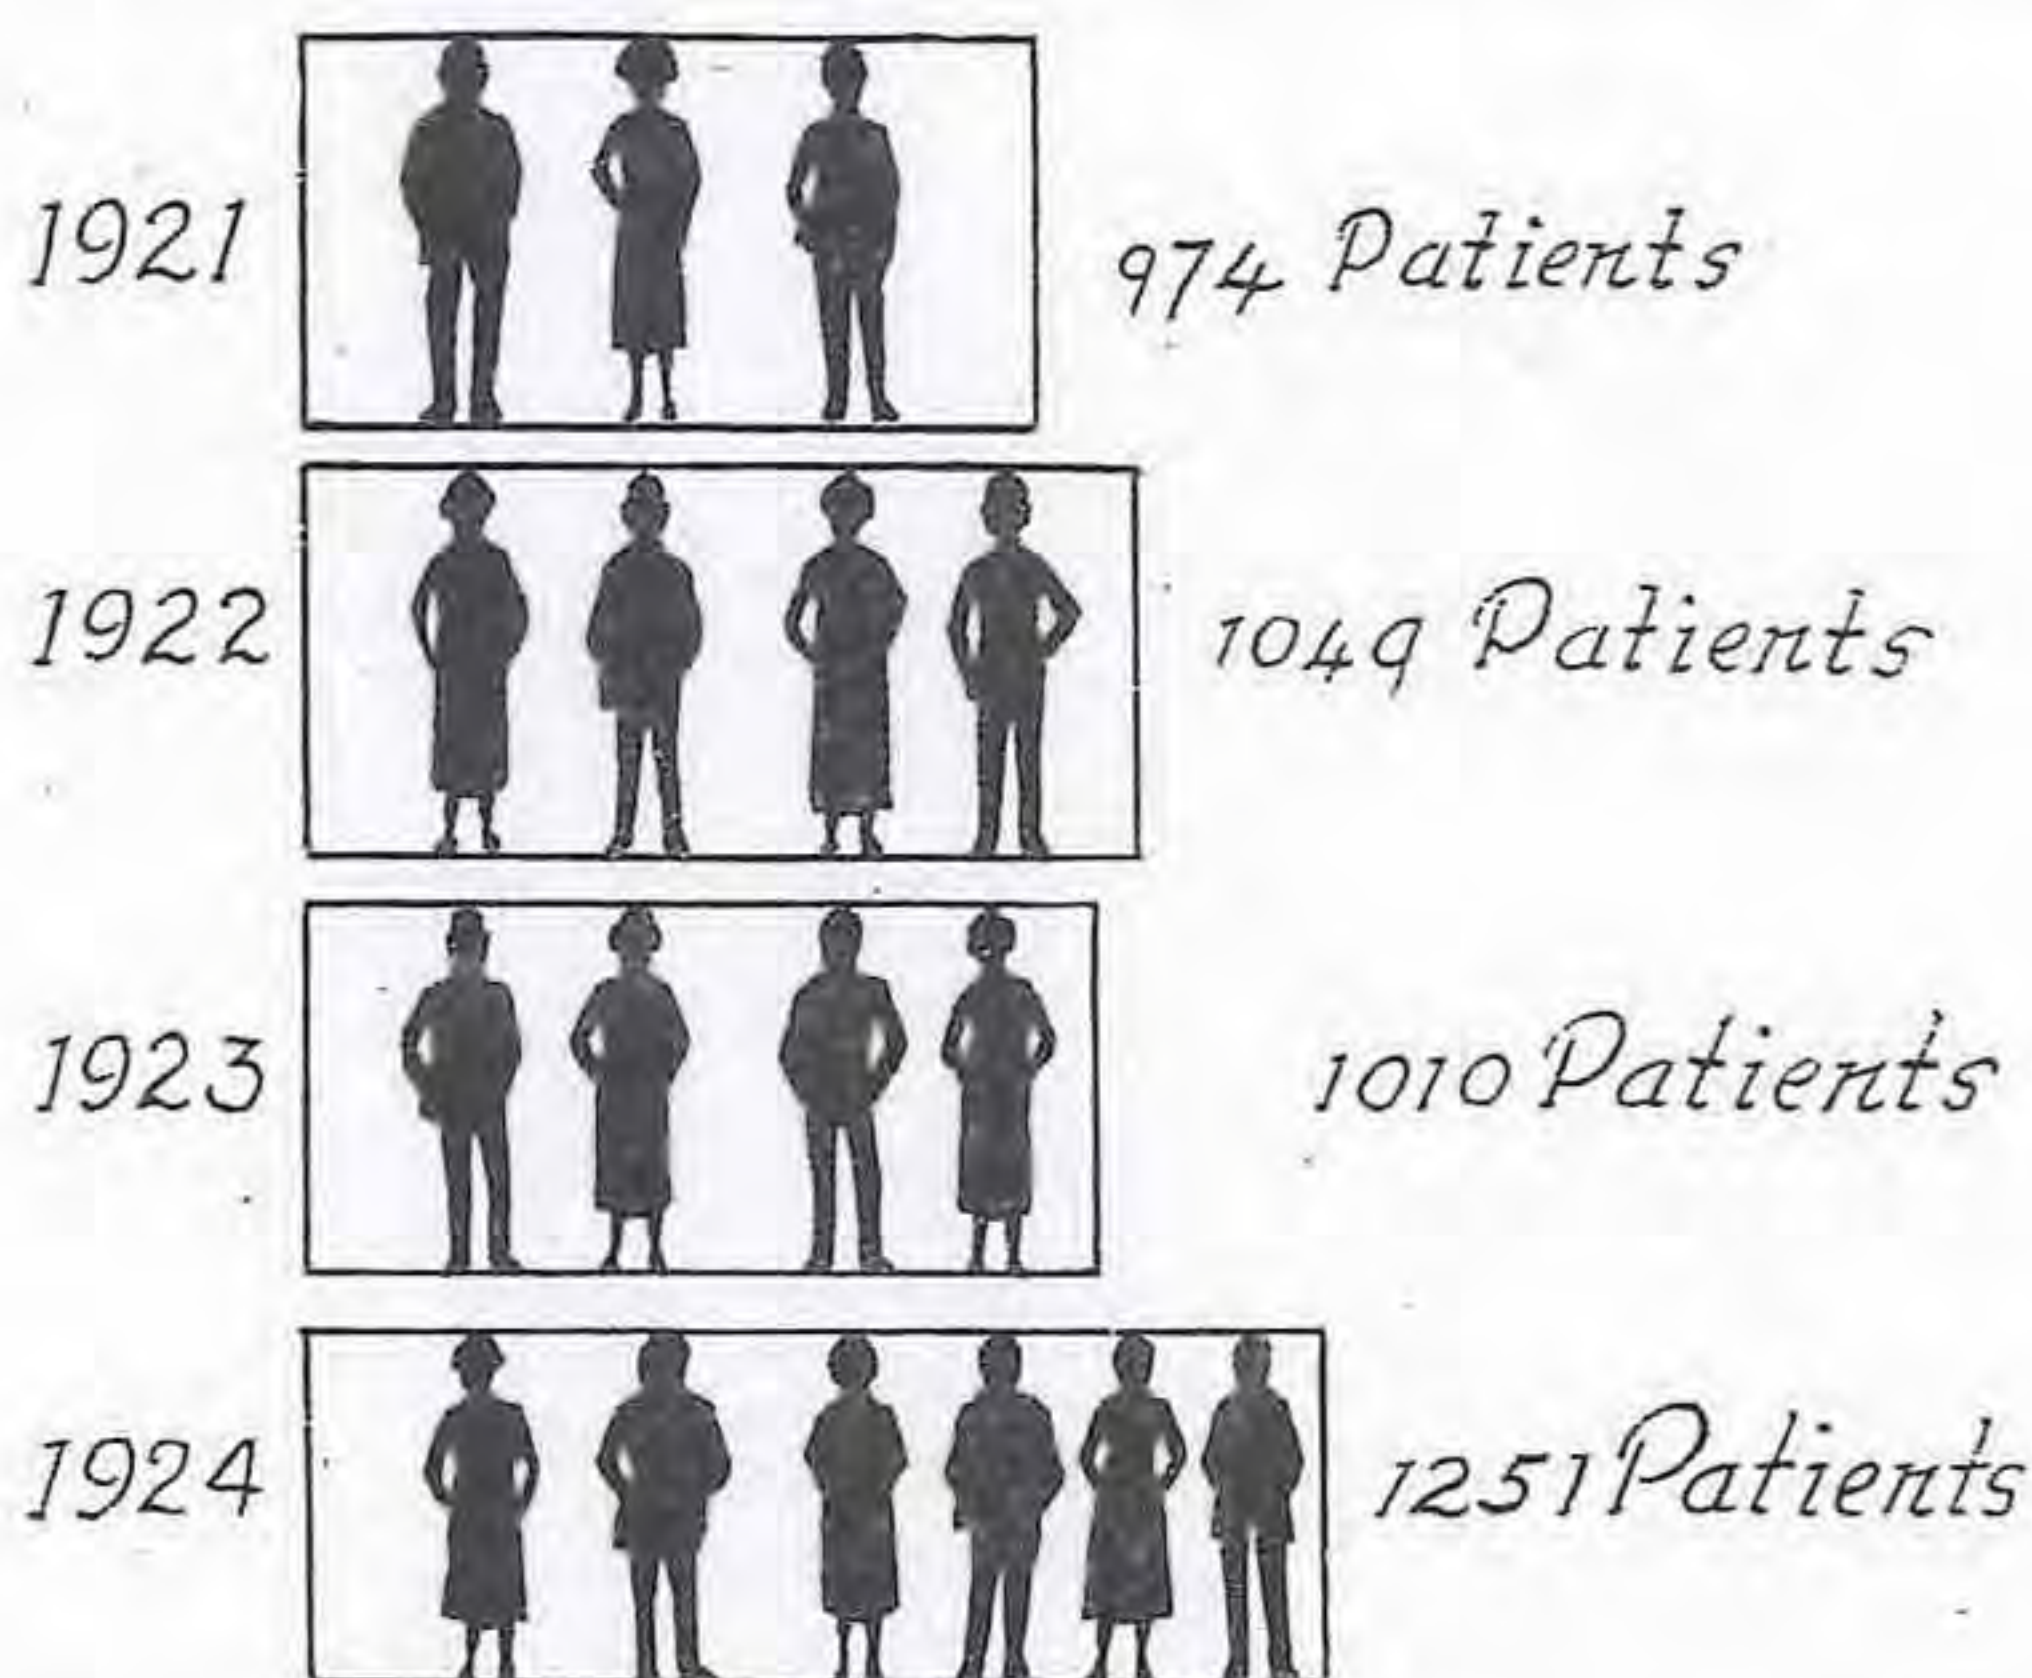

are essential for the care and feeding of scores of sick and suffering patients, and the upkeep of the buildings, equipment and grounds which comprise the Manchester Memorial Hospital.

### The Demands Increase

From the beginning, everyone connected with the Hospital has worked enthusiastically and faithfully for its success, firm in the belief that it had a vital and unique mission to perform for Manchester, and that its services will be increasingly appreciated and supported as time passes. The steady increase in the use of its facilities is indicative that their belief was well founded.

During 1921, for instance, 974 patients were admitted for treatment. Nearly every year this number has increased, and in 1924, 1251 were cared for.

These figures do not include what can be called Out-Patients. While the Hospital does not at present pretend to maintain an Out-Patient Department, there is nevertheless a certain, ever-increasing amount of that class of service. In 1922 there were 68 such patients, and in 1924, 231. Including these Out-Patients the combined figures for 1924 were, then, 1482, which is an increase of 44% in the number of patients receiving treatment at the Hospital in 1921.

### Capacity Sometimes Exceeded

This proof of the increasing usefulness of the Hospital is seen also in the daily average for each year of the number of patients occupying beds. In 1921 the average was 34 patients a day. In 1923, it had jumped to 36.5, and in 1924 it reached 41. Although the normal capacity of the Hospital is 56 beds, there have been times when it has been necessary to provide accommodations for over 60.

Each of the sub-divisions of hospital service shows increased growth, in some instances far more startling than that of the whole plant. Surgical operations have increased from 402 for the first year, to 558 for 1924.

The Pathological Laboratory made 1297 analyses in 1922, 1645 in

1923, and then nearly doubled the number in 1924 when 3160 examinations of twenty-six different kinds were recorded.

The X-Ray Laboratory, for the sixteen months ending December 31, 1922, made 217 examinations of the skull, spine, chest, gall bladder and other parts of the body. In 1924, 361 were made.

### 601 Births Recorded

The Maternity Ward and Nursery figures however give one a real thrill. They alone would make the Hospital worthwhile. These quarters are almost always occupied to capacity, and since their opening 601 lusty, healthy youngsters have been born there.

#### *601 Births Recorded in Four Years*

When one views this record of Service, it must be with a great deal of satisfaction, for it is what the whole community wanted and expected when its citizens built the Hospital in memory of those who died in the World War.

And although we may not have counted it so, this great community Service is making our people one in common loyalty, in common ideals, in mutual understanding and sympathy.

### THE MANCHESTER MEMORIAL HOSPITAL HAS MADE GOOD!

Keeping accurate, up-to-the-minute records is an important part of the Hospital's daily routine.

## Outside—Looking In and likewise Inside—Looking Out

THE MEMORIAL HOSPITAL was established for the sole purpose of serving the sick and injured of our entire community. Most of us give it strong moral and financial support for the most laudable and practical reason, because, through it, we can bring comfort, cheer and good health to hundreds of our neighbors.

But this old world is constantly bobbing up and down, and with it every speck of humanity. No one can ride continually in the saddle of good fortune. Sickness and injury are respectors of no person. And this Hospital, which you are supporting for the good it does others, may be called upon, at anytime, to serve YOU. It may mean life or death to YOU to have the Hospital splendidly equipped with all the facilities of modern medicine and surgery.

It would scarcely seem necessary in this day to point out the benefits of hospital nursing as compared with home nursing. Yet some there are who have not yet fully understood.

### Atmosphere is Homelike

Every patient at home must of necessity feel some concern over the worry and trouble that is caused his family. But his mind is at rest in this respect when in a hospital, for his cares fall upon the shoulders of those who are devoting their lives to that purpose, who are trained, efficient, and who have instantly at hand all the facilities needed to meet the most serious turn in his case.

In the Memorial Hospital particular effort has been made to create a congenial atmosphere. "Institutionalism" is frowned upon. Instead, there has definitely been created a relaxed, quiet, friendly atmosphere that is homelike. A patient here is among friends who are glad to smile upon him.

The Board of Trustees, the Administrative Staff, the Doctors and the Nurses have done a splendid piece of work in building in four short years a hospital service that is well balanced, efficient and progressive. It has become not only a diagnostician and healer of human ills, but the great teacher of the community in ways to prevent sickness.

### Many Ailments Treated

This well rounded service is such as to meet almost every emergency or requirement. It includes surgery, general medicine, diseases of eye, ear, nose and throat, the difficult and tedious task of correcting deformities and the ills and dangers of childhood. It also embraces obstetrics.

And in order that diagnosis may be as precise as possible that the

"guess" may be entirely removed, there are well-equipped, hard-working X-Ray and Pathological Laboratories to make scientific analysis of each case.

Through the various clinics that have been established, the Hospital is discovering incipient conditions that need correction and is instructing those who attend how to remedy them and attain good health. In this way, the Hospital is definitely and materially raising the health standard of the community and is adding to its happiness, contentment, wealth and prosperity.

### Public's Appreciation Evident

That the general public is beginning to understand and appreciate what is being done is shown by the increasing number of voluntary requests for permission to attend the clinics—especially on behalf of children.

Quite fittingly, one of the earliest services established was obstetrics, in order that sound principles of hygiene might be applied in the first stages of life. Expectant mothers may receive close observation and guidance during a most dangerous period, and when occasion arrives, may obtain the services of specialists under conditions that reduce danger and suffering to a minimum.

In the Children's Clinic, the early years of a child may be carefully watched and corrective measures taken to prevent the development of conditions that might seriously handicap its future health. By taking advantage of this service, parents not only learn what they should do and what they should not do to safeguard their children's health, but they are relieved of the worry that is bred of uncertainty and lack of knowledge.

### Anti-Tuberculosis Activities

In April 1923 a Chest Clinic was established. Its function is to examine and observe any cases of suspected tuberculosis or other diseases of the chest.

This Clinic is actively co-operating with the local and State Board of Health in fighting tuberculosis. In families where there is one active case every effort is made to have all other members thoroughly examined. Also when death occurs from tuberculosis the Board of Health requires a physical examination of each member of the family.

By these examinations early, unsuspected cases are discovered before the disease has advanced and while there are still excellent prospects for a complete cure.

The Eye, Ear, Nose and Throat Clinic is the most recently established, having begun its work June 12, 1924. The volume of work which this Clinic might be called upon to do is tremendous, since a large proportion of people have some condition needing attention that falls within the field of its activities. The importance of its work can be appreciated when it is realized that a large number of cases of ill-health can be traced to some defect of the eye, ear, nose or throat, which could have been prevented if attended to in time.

## A Stitch in Time

A simple case in point is given here as an example.

A little girl was brought in for examination. She was not conscious that anything was wrong with her, nor did her parents suspect a hidden danger to their little one. The attending physician examined the little girl carefully and found everything all right until he looked into one ear. Firmly lodged in the passage was some foreign substance. With an instrument adapted for the purpose the physician worked deftly for a minute or two and was enabled to draw forth a large pearl bead. It had given no trouble, but in time it undoubtedly would have caused serious results, if not deafness.

## Readiness Its Watchword

It is, then, a well-rounded, efficient Hospital that you have at hand, ready to place any and all of its facilities at your service. It is a Hospital that is remaking men, women and children, that is teaching us all how to live.

And if perchance the wheel of fortune should suddenly turn and sickness or injury should fall to your lot, the kindness and generosity you have shown for others, in the support of our common Hospital will bring its grateful reward in Service to you that cannot be surpassed throughout the length or breadth of the country.

**NEVER FORGET THAT THIS HOSPITAL IS YOUR  
HOSPITAL WHENEVER YOU NEED IT**

There is a quiet, peaceful atmosphere about each private room which helps materially in restoring health and vigor.

Five "Reasons Why" the Hospital's Maternity Ward enjoys a splendid reputation in the community it serves.

Tender, loving hands clean, dress, and prepare each baby at feeding time.

Gaining every day!

The Hospital Nursery is the last word in cleanliness and sanitation.

# An Inspection Trip

## The Community's Guardian

**D**ERCHED on the rocky crest of Mt. Monadnock is a little crude hut, from the window of which one's eye seems to envelope the whole world. Here, in this lookout, sits a quiet young man, vigorous, alert ever watchful of the great forest spread out below him. He is its guardian and protector, the Fire Warden, who sees all danger and acts swiftly whenever the forest he loves is threatened.

On a hill at Manchester's door stands the Memorial Hospital, watchful of all that lays before it, vigorous, alert, ever watchful, ready to act swiftly when any danger threatens the people of Manchester.

The approach to the Hospital from Haynes Street winds to the hospitable entrance between rows of young trees fast growing to full beauty, living memorials to the forty-five young men of Manchester who gave their merry youth away for Country and for God.

## Entrance is Inviting

The visitor enters the Hospital through an inviting Colonial doorway into a hallway and thence into a most attractive Reception Room furnished in the period of the nation's founders. Opening off this room is the Trustee's Room with its long Tudor table surrounded by replicas of old Windsor chairs. Here is kept the register in which is recorded the comings and goings of the Staff, and the visits of the members of the Board of Trustees.

Across the hall from the Reception Room is the Office of the Hospital's administrative force and the quarters of the Superintendent. Here is the heart of the institution, from which is supplied the vital current of energy for every department. Here too, are kept the mass of accurate, up-to-the-minute records which play such an important part in a Hospital's daily routine.

## The Men's Ward

Passing down the wide hallway on the right, the visitor reaches the Men's Ward, a spacious, restful room accommodating twelve beds. It is here that people of modest circumstances, who cannot afford the expense of physicians, specialists, nurses and costly medicines, can obtain the best for a nominal fee of \$2.00 a day.

If a patient wishes to have his own physician, instead of the Doctor provided by the Hospital, the charge is \$3.00 a day, and such patients are placed in semi-private rooms, each containing two beds. When all of these rooms are occupied, such patients are accommodated in the wards.

## Privacy is Possible

For people in better financial circumstances, the Hospital has seven private rooms on the second floor. Frequently the demand is so great that it has been necessary to install two beds in these rooms also.

Beyond the Men's Ward, at the eastern end of the first floor, is a large Sun Porch, flooded by "old Sol" and filled with an abundance of comfortable chairs. Here are potted plants, many in full bloom, and numerous bouquets of cut flowers. On the tables are books, newspapers and magazines. In a corner a Victrola is playing, filling the air with its cheery melody. On this Sun Porch the men occasionally smoke, play chess, checkers and spin yarns, forgetting their troubles and building up a surplus of good health.

## Sun, Music and Flowers

At the other end of the Hospital building, on the same floor, is the Women's Ward, of similar size and equipment as the Men's Ward. Each of the twelve beds here, however, is curtained so that the patient may at any time have complete privacy.

The Women's Ward also has its Sun Porch overlooking the Western hills and affording splendid views of Connecticut sunsets. It, too, is provided with comfortable lounging chairs, plants, flowers, music and plenty of reading matter which runs to household hints and styles. Basking in the sun which pours through the great, wide windows, or in the privacy of their ward, the women knit, crochet and visit.

From the First Floor, the visitor is usually taken by elevator directly to the Third Floor. At the eastern end is the Operating Room, equipped to the smallest detail for any emergency. It is lined with white tile and furnished with enamelled fixtures which are kept spic, span and sanitary.

## The Mysterious X-Ray Room

Conveniently at hand is the X-Ray Room, possessing the finest equipment obtainable. Quite fittingly this Department is under the direction of one of the leading roentgenologists of the country. It is easy to understand that such equipment as this room contains and the Service which this Department renders is expensive to operate and that if it is to serve the community in the fullest degree an endowment fund must be provided at the earliest possible moment.

## A Very Busy Place

Across the hall, and adjoining the Operating Room, is the Pathological Laboratory. On the shelves which line its walls are hundreds of bottles of drugs, chemicals and solutions. There are scales, microscopes and test tubes, in fact everything in the way of apparatus required to

determine scientifically by analysis the ailments to which man falls victim. This is one of the busiest Departments in the entire Hospital. For upon it is placed the work and responsibility of making a pathological examination of each and every patient.

A Pathological Laboratory is just as expensive to operate as it is necessary. This one is no exception. The Department is well equipped, but it does need an endowment to maintain it and enable it to extend its work.

The Doctor's Consultation and Rest Room is the final member of this group of work rooms. It is a comfortable, well-appointed retreat where the medical men may discuss their problems and be free from interruptions, and where they can relax after the performance of their duties.

On the Third Floor there are also three of the semi-private rooms for patients, previously mentioned, as well as the living quarters of the Hospital's Superintendent, Resident Physician, Dietitian, and Technician. This space is urgently needed now for rest rooms, isolation rooms, a Children's Ward, or some of the many other special quarters that cannot be provided at present.

## Quiet, Peaceful Private Rooms

Taking the elevator again, the visitor finds on the Second Floor seven Private Rooms opening off the corridor, and within easy access another large, attractive Sun Porch at the eastern end of the building. There is a quiet, peaceful atmosphere and a charming simplicity to each of the Hospital's private rooms which helps materially in restoring health and vigor.

A small, semi-private Maternity Ward is also located on the Second Floor, with accommodations for ten patients and twelve babies. Opening off the Maternity Ward is another large Sun Porch looking toward the west and the beautiful Connecticut hills and valleys.

## Babies are Most Exclusive

The babies are the most exclusive guests in the entire Hospital. They are kept to themselves, away from guests and visitors, in an immaculate Nursery. It gives one the thrill of his life to see a whole row of these mites of humanity taking a sun bath.

In the basement of the Hospital is the Emergency Room, where a visitor sees the quarters in which patients are given first aid. Here also a thorough examination of a patient's condition may be made before he is admitted to the floors above.

The Nurses' Dining Room, the Heating Plant, and a temporary Laundry are likewise located in the basement. A modern laundry is now in course of construction and when completed will be a very valuable addition to the equipment of the Hospital.

A visitor is next taken to one of the most interesting places in the whole Hospital, the Kitchen, where meals are skilfully prepared of the right food, properly cooked, with variety to stimulate the appetites of scores of patients and to satisfy the requirements of the Hospital employees.

### "Spotless Town's" Rival

Here in this corner of "Spotless Town", housewives find keen delight in observing the immaculate cleanliness, the white table tops, the brightly polished pots and pans, and the neatly arranged dishes and cooking utensils.

The "Central Service System" is in use at the Memorial Hospital. Trays containing serving dishes, tea pots and cups are placed on large food conveyors which are mounted on wheels and brought alongside the ranges. Heavy covers are placed over each dish of food so that it reaches the patient as hot as it would in a well regulated household. An advantage of this system is that the Dietitian can properly supervise the diet of each patient.

It is hoped eventually to develop the Kitchen into a teaching laboratory where patients who are nearly ready to leave the Hospital can be taught how to prepare a proper diet, and doctors may send patients who need special instruction in the preparation of well cooked, nutritious food suited to the special requirements of the various types of patients.

### Pride and Satisfaction Mingle

It is with a feeling of deep satisfaction and pride that a visitor completes his tour of inspection. He has seen with his own eyes an institution which in four short years has grown from obscurity to a full-fledged Class A Hospital, recognized as one of the efficient, well equipped, carefully managed Hospitals of the country.

The effort, sacrifices and generosity that have made this Hospital have been well worth while, and as the years roll by will prove to be one of the best investments in public welfare work the citizens of Manchester have ever made.

# Many Accomplishments—How?

## 5,000 Patients in Four Years

**WHO HAS** benefited by the financial support you have given the Memorial Hospital, and for what has the money been spent? It has quite naturally required a considerable sum to carry on this work during the last four years. Five thousand patients cannot be cared for and made well for a song.

What would it cost, do you think, to feed 54,102 people for twenty-four hours? That is equivalent to what the Memorial Hospital has done during the past four years. What, do you think, it would cost to supply them with surgical and medical supplies if they were all sick, which they were? What, do you think, it would cost to supply them with clean linen? What would it cost to maintain a place to house them? What would it cost to secure the services of the necessary doctors, nurses and other assistants? It would be staggering!

## What It Has Cost

By the practice of strict economy the Memorial Hospital has answered the above questions and the service has cost approximately \$250,000, an average of slightly over \$64,000 a year.

Some of the money expended has been obtained from patients in the form of small fees and daily room rates. But there is hardly a hospital that is serving the public that is self-supporting, for by the very nature of things a large portion of the service rendered can never be paid for.

In almost every instance the cost of operation of the various subdivisions of the Hospital is increasing each year.

## Expenses are Heavy

The administrative expenses have been maintained at a minimum. The professional care of patients, salaries of attendants, medical and surgical supplies, drugs, anesthesia, X-Ray and Pathological Laboratories, and Social Service Department, have cost approximately \$24,000 a year. The expenses of the Nurses' Residence, the Laundry, the House-keeping Department, the Kitchen, and of Food, have exceeded \$25,000, and the maintenance of the physical plant has aggregated \$10,000 annually.

# Needs Urgent—Expansion Necessary

## Facilities Becoming Inadequate

THE MORE one serves humanity, the more one finds that is necessary to be done. There is virtually no limit to opportunity, nor escape from urgent need. This is probably the best thing that life holds.

The Memorial Hospital has served the community well during the past four years, but with each Service it has performed it has seemed that the urgent need of further Service has presented itself.

The community is growing rapidly, also the public's use of the Hospital's facilities is increasing. Together, these two conditions are placing a severe tax upon its ability to render adequate services with the facilities available.

No one wishes to see the Hospital curtail its effort to increase the health, happiness and prosperity of our people. No one wishes to see the Hospital stand still, and do no more than at present.

If one is to continue to serve, one must grow. The need of expansion is being forced upon your Hospital.

Already the Hospital finds itself seriously handicapped in several directions. The number of patients accomodated each day is fast approaching present capacity. On many occasions the Hospital has been overcrowded and there have been times when no more patients could be accommodated.

## Children's Ward Essential

A Children's Ward is urgently needed. The original ward was of necessity given up to provide a Nursery to accomodate the newly arrived babies. It is obviously far better to segregate children—far better for them and for the adults who would otherwise be in the same ward with them. As it is, we cannot give the children the satisfactory attention to which they are entitled.

There are also many times when conditions develop—an infectious disease or a serious turn of events—which make it advisable to isolate a patient. At present there are no Isolation Rooms, and they should be provided at once for the better Service of all concerned.

## Many Equipment Needs

Improved Kitchen facilities are needed, additional ice boxes and other equipment, and a separate Diet Kitchen for diabetic patients and cases that require special diets.

The First Floor Wards and the Maternity Ward are in pressing need of improved facilities in the lavatories. At the present time the equipment is entirely inadequate.

## Nurses Must Have New Residence

The erection of a new and more commodious Nurses' Residence is one of the most urgent needs. The increasing number of patients re-

quire more nurses. More nurses require additional accommodations. Plans have already been prepared for such a building which will be constructed on the Hospital grounds as soon as funds are available.

### School of Nursing is Planned

There is another phase of our Nurse problem that is possibly not often considered. At present we are only "consumers" of Nurses. We are not adding a single nurse to meet the demands of the world. We are letting other institutions do all the "producing"—our share as well as their own. A new Nurses' Residence, when built, will be the initial stage where we may hope to develop ultimately a School of Nursing.

The completion of a new Nurses' Residence will necessitate the erection of a central Heating Plant, in a building detached from the other buildings.

### The Help Problem

The "Help Problem" must also come in for immediate attention. Our employees are loyally laboring under some great inconveniences, the chief of which is cramped sleeping quarters. We must promptly supply them with adequate facilities, as it is unreasonable to expect a high degree of efficiency, a healthy morale and a happy frame of mind under unsatisfactory conditions.

### Solution of Problems Vital

These are the major and most urgent needs of the Hospital. There are literally hundreds of minor ones which, if met, would materially improve the Service the Hospital can render. It is vital to the work of the Hospital that ways be found to solve these problems. It is in fact more vital to the community.

In pointing out the major needs, it is hoped that those of our fellow citizens who have wished to make some really telling contribution will be given a suggestion that may meet their favor.

The Nurse's Home provides hygienic, home-like surroundings, but larger, better quarters is one of the Hospital's urgent needs.

# Thoughts to Reflect On

## Was the Sacrifice in Vain?

THE WORLD WAR was a terrible catastrophe. And yet it bore some good. No one who lived through it, here or there, will ever forget the spiritual thrill that came from the complete erasure of distinction between men because of social, racial, or economic status. Every man, woman and child had a mission of service and was honored because of it.

We were face to face with reality for once and awoke, momentarily at least, to two elementals of life; that social distinctions are superficial and unnatural, and that the physical safety and spiritual salvation of us individually and of the world at large rest squarely upon Service. They become self-evident, hard-headed facts.

All Manchester throbbed as one in that Service. Hundreds of our youths "threw up their jobs" and tramped away to battle. Forty-five, with smiling lips, went away never to return. It was a sacrifice they eagerly made, but one we expected and asked.

Why did we ask this sacrifice? Why did we sacrifice to the utmost ourselves. Was it merely to defeat a foe? Was it to justify our international honor? Was it to prevent in the dim future a hostile invasion of our shores? Was it because we thought the time opportune aggressively to force our American conceptions of social and political relationships upon an exhausted world?

## Service Was War Impulse

These are some of the thoughts we held at the time, it is true, but calm reflection is gradually clarifying the real reason for the American effort. As a Nation we were actuated by one impulse—to Serve a weary, world humanity—to Serve even the belligerent people opposing the Allies.

When the war was over, those of us who had served at home wished to honor our fighting youths. And so we erected this Hospital as a Memorial. It was a beautiful thought and it is a beautiful monument, and its beauty alone is sufficient to justify its erection.

When you ask a man to risk or to give his life for some purpose, you strike at the very vitals of things. There falls upon you the inescapable obligation of carrying on that purpose from where he leaves off.

## Memorials Utilitarian

Most communities throughout the United States have come to appreciate this fact, and the Memorials are taking on the form of centers from which the Service of humanity may be continued—hospitals, community buildings, public auditoriums, schools.

Here in Manchester we very wisely chose a Hospital as it offered us the opportunity of greatest Service to our people. We were thrilled at the chance to do something big for Manchester, and as one we rushed to the task, worked and gave until the necessary funds were raised. The Hospital had become the symbol of a self-supporting, self-respecting community.

And now that we have it we must support it. We must make it possible to grow and to extend its Service. Through it we must carry on the Service of humanity for which we asked our youths to give their lives. This is no one individual's task. It is the work of all and it can be successful only if every man, woman and child does his bit.

## How Can You Help?

First of all, you must understand and feel that the Hospital belongs to you personally as much as anyone. Then you must "boost" for it—not only believe that it is one of the finest institutions of its kind in the country and of vital necessity to the community, but "tell the world" about it. Finally, work for it all the time. Save your pennies and pour them into the common pot.

Try it for a while, and experience the glow of satisfaction from worthwhile Service.

There is always need of money with which to carry on the work, and at present there is immediate need of additional funds for special purposes.

It costs about \$30,000 a year more than the patients are able to pay to render proper Service at the Manchester Memorial Hospital. The sum grows larger each year with the increasing number of patients. The necessity for public support to this extent will always be with us.

Companionship and pleasant diversions play an important part in Hospital work during the long days when patients are "getting well."

## Here is What's Needed

An endowment of \$50,000 should be established for operating the Pathological Laboratory, and another endowment of \$50,000 for the X-Ray Laboratory and Physiotherapy Department.

\$2,900 is needed at once for additional Kitchen Equipment, and \$3,800 is required to install improved facilities in the Lavatories for the First and Second Floor.

As soon as possible, we must provide \$100,000 for a new Nurses' Residence, and living quarters for those who are now using rooms that are needed for such purposes as a Children's Ward, Isolation Rooms and additional quarters for Private Patients.

Let's face the facts—continuous, generous public support is a necessity, if the Hospital is to meet the growing demands of the community. And this support must be universal, the small contributor must do his share, and the man or woman of means must participate in proportion.

## Carry On

We really did better than we thought when we built this Hospital. We gave ourselves an unsurpassed opportunity for unlimited and perpetual Service to humanity. And now, unless we are willing to admit that our efforts in the World War, our sacrifices, our noble aspirations, our dead were in vain, we must carry on.

We must shoulder our task as a duty and a privilege, reaping our reward from the sweetest satisfaction that can come to mankind—Service for others well done.

**MANCHESTER MEMORIAL HOSPITAL IS TRYING  
HONESTLY TO DO ITS BEST.**

**WILL YOU DO YOURS?**

Children quickly respond to the wonderful healing influence of the good food, fresh air, expert medical attention, and sympathetic care which they receive here.

# HONOR ROLL

*of the*

Men and Women of The Town of  
Manchester who served their  
State and Country during  
the World War of  
1914-1918

**CONTRIBUTORS**  
**TO THE**  
**MANCHESTER MEMORIAL**  
**HOSPITAL**

—by their help this Institution was made possible; by their continued help, and the generous donations of many other loyal supporters, this Hospital will maintain an increasingly valuable Service to one and all

**IS YOUR NAME**  
**WRITTEN**  
**HERE**  
**?**

## Life Members

Any individual or corporation who has contributed \$100.00 or more at one time, becomes, by that act, a life member of the Manchester Memorial Hospital, and is entitled to a vote at all meetings of said corporation.

The modern X-Ray machine is indispensable for diagnosis and for the treatment of many diseases.

The Operating room is kept immaculate, and everything is thoroughly sanitary.

A corner of the Receiving room, where every facility is provided for a thorough examination of incoming patients.

Large, airy sun-rooms, erected at each end of the Hospital, are a never-ending delight for "shut-ins."

The tests made in the Clinical laboratory are an invaluable aid to surgical and medical science in the treatment of patients.

The Hospital kitchen, where well-cooked, appetizing food is carefully prepared.

Individual trays of tempting food are quickly, quietly and conveniently brought to each patient's bedside.

## Report of Auxiliary Committee 1923-1924

To the Board of Trustees:

Gentlemen:

The Chairman of the Hospital Auxiliary submits the following report for 1923 and 1924:

Auxiliary work in connection with the Manchester Memorial Hospital was begun as soon as the Hospital opened its doors to receive patients.

For about a year the Emergency Committee of the Manchester Chapter, American Red Cross met at the Hospital every week, except during the summer, to help with the surgical dressings and the sewing. Then a regular Hospital Auxiliary was formed, entirely separate from the Red Cross and has been functioning since that time, meeting once a week at Watkins Brothers' store. There are about one hundred women, at the present time, divided into five groups. Four of these meet at Watkins Brothers, Inc., and the fifth, a neighborhood group, usually meets at the home of Mrs. J. P. Cheney.

Present officers of the Auxiliary are:

General Chairman . . . . .	Miss Helen G. Chapman
Secretary . . . . .	Mrs. Henry Nettleton
Treasurer . . . . .	Mrs. George W. May
Chairman, Executive Committee .	Mrs. W. C. Cheney
Vice Chairman, Executive Committee	Mrs. Carl Bengs

The groups are headed by:

Group 1 . . . . .	Miss Helen G. Chapman Mrs. Frank Wolcott
Group 2 . . . . .	Mrs. E. A. Lettney Mrs. LeVerne Holmes
Group 3 . . . . .	Mrs. R. O. Cheney, Jr. Mrs. Albert White
Group 4 . . . . .	Miss Mary Hutchinson Mrs. Wm. Knofski
Group 5 . . . . .	Mrs. J. P. Cheney

During 1923, the four groups meeting at Watkins Brothers, Inc., together with a small group headed by Mrs. James Robb, made and mended 874 articles. No record was kept of the articles made by the neighborhood group, but with these added, the total would undoubtedly amount to well over one thousand.

During 1924, approximately 1,200 pieces were made and mended by the Auxiliary groups and 989 pieces by the Neighborhood group.

HELEN G. CHAPMAN, Chairman

## Report of the Hospital Linen Finance Committee

In the year 1923, the Committee, with the aid of the sewing auxiliary, raised \$400.00 for linen for the Hospital.

In 1924, \$700.00 was given to the Hospital for linen, by the committee.

MRS. WILLIAM C. CHENEY, Chairman  
MRS. GEORGE MAY, Treasurer  
MRS. HENRY NETTLETON, Secretary

## Chest Clinic

The Chest Clinic was started on April 11, 1923 and since that time has held 71 clinics.

Number of patients examined.....	340
Number of re-visits.....	158
Number under observation.....	146
Number discharged as "no case".....	28
Number sent to sanatoria.....	10
Number patients died.....	8
Number transferred.....	3
Number discharged as "unwilling".....	5
Number visits to homes.....	573

## Children's Clinic

Patients.....	28
---------------	----

## Social Service (1923-1924)

The Social Service work of the Hospital was started in January, 1923.

Total number of patients having received Social Service assistance.....	166
Total number visits made to patients in wards.....	1040
Total number visits made to homes.....	1004
Total number of patients referred to other agencies.....	13

(Of the above, two were placed in boarding homes in the country, two in the Mansfield Hospital for epileptics, one child in the Newington Home for Crippled Children, one infant was adopted, and one maternity mother returned at her own request to her native country.)

Special appliances furnished were one spinal brace and two sets of artificial teeth.

From the Loan and Emergency Closets numberless articles were loaned and distributed.

The Social Service functions thru the local Chapter of the American Red Cross. Other agencies having shown interest in the work are the Benevolent Society of the Center Congregational Church, the Duofold Knitting Co., the Lend-A-Hand of the "Manchester Evening Herald," the Community Club and a number of interested persons.

The Social Service Worker also carries on the work of the Chest Clinic, report of which is given above.

The Child Welfare Worker carries on the work of the Children's Clinic.

## Financial Statement, January 1, 1925

(The Manchester Trust Company, Treasurer)

## Anonymous Gifts

Many anonymous gifts of magazines, books, flowers, and other material things, as well as gifts of time, knowledge, and personal service for the comfort and welfare of patients and workers are acknowledged at this time to the host of nameless donors who have contributed to the Hospital.

It is difficult to put into words an appreciation of what so many people do for us, but we do wish to express our appreciation to such donors in this formal way, as we always try to do informally at the time.

### Special Contributions for the Emergency Admitting Room

# DO YOU CARE?

Do You Care to bring health and happiness to your friends, your community and yourself?

Do You Care to give your children and babes a fair start in life?

Do You Care about Manchester? Do you want to be proud of her Hospital?

Do You Care to play square with the youths who gave their all in the World War for the love of Service?

Do You Care to justify the sacrifice you expected of them?

Do You Care to do the greatest thing God grants mankind?

Do You Care to serve your fellow man?

## IF YOU DO

Sign the pledge below. Hand it in the next time you pass the doors of The Manchester Trust Company, or, if more convenient, Mail it.

Give what you can. And remember, the man who can afford to give only a few dollars--AND GIVES THEM--is doing a bigger and worthier thing than the man who can afford to give \$100,000 and gives only \$1,000.

Will you give all you can?

## HOW MUCH?

## PLEDGE SLIP

The Manchester Trust Company,  
South Manchester, Conn.

.....1925

As my contribution to the support of THE MANCHESTER MEMORIAL HOSPITAL for the year ending May 3, 1926,

I hereby contribute..... Dollars payable one-half not later than June 15, 1925, the balance on or before February 15, 1926.

Amount of Pledge

Signed.....
